

# THE BLAIRMORE ENTERPRISE

VOL. XIII, NO. 16.

BLAIRMORE, ALBERTA, THURSDAY, APRIL 20, 1922.

\$2.00 YEARLY

Yes, that house has been in the family for 50 years.

**TOO PROUD TO WHITEWASH AND TOO COSTLY TO PAINT**

This is why so many buildings in the West have remained unprotected during the last few years.

## BUT TIMES HAVE NOW CHANGED!

Paint and Paint Materials have come down to such a price that no-one can afford not to paint and to leave their buildings depreciate at the mercy of the elements. When you buy

## BAPCO PURE PAINT

you  
DON'T TAKE ANY CHANCES

You know what you are getting. You know it has the covering capacity and the lasting quality. We have sold it to you for twelve years. BAPCO PURE PAINT is made in Victoria, B. C., and is especially well adapted to the climatic conditions of the West.

The Price is Right  
Every Tin Guaranteed ) \$5.25 per Imp. Gal.

**Blairmore Hardware Co.**  
BLAIRMORE, ALBERTA

## LOCAL TRAINS NOT TO BE REMOVED YET

Word has been received from the Board of Railway Commissioners to the effect that pending further consideration of the protests raised by towns on the Crow line west of Lethbridge, the daylight trains will not be taken off. Protests will be considered at the next sitting of the board, the date of which has not been announced.

## GUARANTEED STEAMSHIP CONNECTION

WINNIPEG, April 17.—A guaranteed connection between trains and steamships bound for Europe has been announced this week by the Canadian Pacific Railway officials at Montreal. Under the new arrangement this guarantee of connection with steamships is extended more surely to travellers from points further west. If any of the trains bearing steamship passengers are delayed in arriving at Montreal, the steamship will be held two hours, if by doing so the passengers can embark at that point. If the delay is longer, the steamship will proceed to Quebec and there will await the delayed passengers. Transportation will be arranged from Montreal to Quebec for passengers booked to sail from Montreal. Company officials announced further stating that when a passenger boards a train on the Canadian Pacific that is due to connect with a company steamship at Montreal, or Quebec, he is stepping on the gang plank.

## CARD OF THANKS

Mr. and Mrs. Charlie Slopek desire through The Enterprise to thank the many people who took part in the dance given for their benefit at Frank on Monday night, and from which they received the handsome sum of \$143.50.

## CLAIMS BIG OFFER FOR AN OIL LEASE

TABER, April 13.—Levi Albert, farmer, six miles from Retlaw, arrived today from Northern Montana, after visiting his brother, a Montana farmer in the vicinity of the Kov'n district, whose half section carries mineral rights. The Montana brother was offered by two different parties, the same afternoon, \$32,000 for the half section, but was holding out for \$50,000, when on the advice of the Retlaw brother, he decided to accept the offer, providing a royalty of two barrels per 100 if oil be found on the property, should be added, and left for Coleman, Alberta, to obtain the signature of his wife, at present there, later going to Tacoma, Wash., to complete the deal.

## FOUR MONTHS FOR SHOOTING

Before Justice Gresham in the police court yesterday, John Gekas, (John the Greek) was sentenced to four months hard labor in the penitentiary for shooting and wounding a miner at a gaming joint in Hillcrest. He also fined him \$15 or another month for carrying a dangerous weapon, not being a British subject. We understand that an appeal may be entered in the former case.

## VALUABLE PROPERTY CHANGES HANDS

The beautiful residence of Mrs. S. H. Klutrock, located on the corner of State Street and Tenth Avenue and facing the Union church, was purchased last week by Mr. I. Wilson, of Frank.

The property is one of the best in town.

## DEATH OF FRANK PATERA

The death of Frank Patera occurred at the local hospital at noon on Tuesday, following a prolonged illness.

Frank was fifty-six years of age and one of the best known and most popular of the local Bohemian miners, a number of years, at one time employed at the Frank mine, but of late has been connected with the workings at Greenhill.

He leaves a wife, two daughters and a son to mourn his loss.

Interment takes place today at the general Protestant cemetery, under the auspices of the Bohemian National Alliance and the United Mine Workers of America, Rev. W. T. Young officiating.

## BASEBALL CLUB REORGANIZES

The baseball meeting held in the office of the Crows' Nest Pass Motors last Wednesday night was not very well attended, owing, perhaps to the inclement weather that prevailed that evening.

After hearing the statement of last year's finances, the following were elected as officers for the ensuing year:

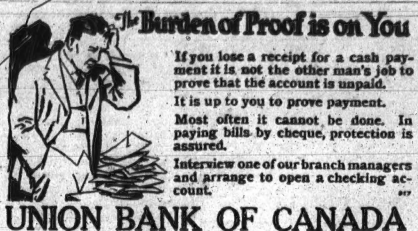

Honorary President—Mr. J. Charbonnier.

Honorary Vice Presidents—P. M. Christophers, M.P.P., J. E. Gillis and Mayor A. McLeod.

President—W. Bird.  
Vice President—J. P. O'Neill.  
Secretary-Treasurer—J. McDougall.  
Letters were to be sent to Michel, Coleman, Bellevue, Cowley and Pincher Creek clubs to get their ideas of forming a league this year, and if it was favorable with them, Blairmore would also line up.

The club this year is named The Blairmore Amateur Baseball Club, and will stay strictly in amateur circles.

The secretary was instructed to start a subscription list to buy new uniforms and equipment, as all of last year's was destroyed by fire

**The Burden of Proof is on You**

If you lose a receipt for a cash payment it is not the other man's job to prove that the account is unpaid. It is up to you to prove payment. Most often it cannot be done. In paying bills by cheque, protection is assured.

Interview one of our branch managers and arrange to open a checking account.

## Entirely New Treatment For Bronchitis, Catarrh

### No Internal Medicine to Take

Years ago the profession taught Catarrh by internal dosing. This upset the stomach and didn't remove the trouble. The new treatment consists of breathing the healing, soothing essence of Catarrhine, which goes instantly to the source and the trouble. Catarrhine is successful because it penetrates where liquid medicines can't go. The balsamic vapor of Catarrhine drives out the germs, soothes the irritation, relieves the cough, makes Catarrhal troubles disappear quickly. For bad throat, cough, bronchitis, Catarrhine is a wonder. Two-month treatment one dollar. Small also 50c. Sold everywhere or the Catarrhine Co. Montreal.

## Vertical Flight Problem Solved

Test of Handley-Page Slot-Wing Proves Successful

The latest tests with the new Handley-Page high lift slot wing show that the future of vertical and horizontal flights is solved by aircraft fitted with such high lift wings rather than by the helicopter system.

The new Handley-Page torpedocarrying aeroplane, the first machine fully equipped with the variable slot wing, has undergone further test flights.

Soon as the engine was "opened up" the biplane jumped straight into the air with practically no preliminary run.

When the slots were closed it showed a very high speed; when they were opened again the machine slowed down to practically all and descended vertically on an even keel for more than a thousand feet, in a space about as big as a tennis court.

What is more important still it could have flown away again from the same restricted space.

The action of this opening and closing wing is similar to the action of a bird's wing when it opens and closes the main feathers for slow landing on a telegraph wire, and when flying from a confined space.

It was invented by Handley-Page in March, 1920, since when Handley-Page's have been carrying out exhaustive tests.

The latest machine is nicknamed "The Hittin'" owing to its being said to have 57 different varieties of control.

The machine proves that this wing is a definite revolution that is going to make aviation a wonderful commercial proposition.

### Business Brothers

President Neilson, of Smith College, was making a rather tedious journey and was glad when the man who had the seat in front of him turned around and began to converse with him. The man proved to be a travelling salesman and took it for granted that Dr. Neilson was another. "What's your line?" he asked. "Mine's skirts," "Well, so is mine," said the president of Smith—New York Evening Post.

## Could Not Eat

Constipation is caused by a torpid condition of the liver. Dosing with salts, castor oil, etc., to move the bowels, cannot afford more than temporary relief.

If you are to rid yourself of this ailment and the scores of annoying symptoms and diseases which come in its wake, it is necessary to get the liver right by such treatment as is suggested in this letter:

Mrs. Alvin Richards, R. R. No. 1, Seely's Bay, Ont., writes: "One year I was afflicted with indigestion and in the morning when I got up my breath was bad. I had a poor appetite, and just felt like eating curries. I used many different medicines as a laxative without benefit, and the doctor's medicine did not help me at all. Finally I used Dr. Chase's Kidney-Liver Pills and found them better than anything I had ever tried. I can highly recommend them to anyone troubled with constipation or kidney troubles."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers, or Edmunds, Bates & Co., Ltd., Toronto.

W. M. U. 1418

## Tokio's Railway Problem

Carry Million Passengers Daily on 181 Miles of Line

Whilst the Japanese Government railways carry 1,300,000 passengers daily on their system which comprises 6,000 miles of railroad, the Tokyo street cars carry the same number of persons per day on only 181 miles of line. To do this 7,800 cars are in continual use, and it is estimated that 180,000 miles are covered by them every day—a distance of more than six times round the earth. It will readily be understood that the overcrowding in cars is a serious matter, and improvements are continually being adopted, the construction of underground railways being now under consideration.

## ACHES AND PAINS—SLOAN'S GETS 'EM!

AVOID the misery of rubbing pain. Have a bottle of Sloan's Liniment on your shelf. It is the only remedy you need for the aches and pains of rheumatism, neuralgia, sciatica, sprains and strains, stiff joints, lame back and sore muscles. For forty years Sloan's Liniment has been a household name. Ask your neighbor. At all drug stores—35c, 70c, \$1.40.

**Sloan's Liniment**

Have You Ever Seen a Basilisk?

HERE is not very much that is particularly attractive about the Basilisk other than the general interest that exists in every living and breathing being. Just like others of greater or lesser degree the little Basilisk's life is a struggle. At least, with rounds of days and nights of absorbing interest. It sleeps, it eats, and this, by the way, is a constantly evolving and engrossing business; for the little fellow has to hunt, chase and kill its own food. Also, as every earthly creature has a certain duty to perform, so has the Basilisk. This duty is the same that falls to the lot of every insect eating creature. If insects were not being reared every day, hour—minute—our world would soon be not only possessed entirely by them but completely overrun by them.

Pimble one day was on one of his tours of adventure in South America. He happened to be perched on a thick leafy branch watching the antics of some chattering Monkeys when suddenly his eyes fell on a Basilisk. A green-brown one covered with scales! "Help!" the Brownie prayed in a whisper. "Oh, help!" for he thought that surely his last moment had come. Never again would he see his adored Stella, the Wishing Fairy! Never again would he see their beloved End-of-the-Earth home!

When you remember that the Brownies are only about a quarter of an inch in size the Basilisk's thirty inches looked fully a mile long to the terrified Pimble, and, to make matters worse, the Basilisk was coming straight toward him, with his mouth wide open! "It could easily swallow a dozen such as I!" he thought, and his heart pounded so hard against his ribs that he was sure it must echo through the hills. "Oh, help!"

Imagine his amazement when the Basilisk passed him without as much as a glance of notice, and a little distance further on caught a large winged insect in its jaws, which it swallowed with a grin of delight! "Then I'll be down on a big Spider; a Caterpillar went next, and Pimble in the course of a short while counted at least sixteen victims to the Basilisk's appetite. "Evidently I'm not considered good eat," thought Pimble, "but perhaps I might be more appreciated to talk with. Let me see." So, wriggling down the branch in the direction of this odd animal, he approached it with a question. "What tasted the best?" he timidly asked. "It was a lucky subject, for it was one particularly appealing to the Basilisk."

"The Caterpillar, of course," it answered. "I always like them better than insects, because they are soft and fat and have no hard shell to scratch my throat. I don't know anything that I don't know all about. Who are you?" Pimble was just about to tell him when he thought that after the remark about never eating strange things perhaps it would be wiser not to. "Oh, I'm a stranger from the End-of-the-Earth."

Copyright, 1922

that I was too busy watching you. You are a wonderful hunter," the Brownie said. "This pleased the Basilisk so that it immediately began talking of itself. And Pimble learned all about everything connected with its life and family, and the two then and there became quite friendly. There also was a Bifid Basilisk that lives near the water, and dropping in, it swims away from danger. Its eggs are left for the sun to hatch and, like its helmeted cousin, it also lives on insects and fruit.

they are promptly taken in hand and given every encouragement. If they are mechanics and want to go to the different cities they are acquainted at with the conditions prevailing in their particular trades.

Dr. A. H. Hippie is chairman of the citizens committee which is arranging to have J. Bruce Walker, commissioner of Dominion Publicity, deliver addresses here before the Chamber of Commerce, the Kiwanis and Rotary Clubs. Dr. Hippie spoke enthusiastically of the movement towards the Canadian Northwest. Prominent business men are helping the movement which they say they expect to see toward Canada and the Central States this spring.

According to scientists sounds are diverted and lessened during rain. That is because the falling rain "twists" the sound waves from their course.

Fisherman's Friend The Original and Only Genuine

Many Canadian and American soldiers who served overseas are anxious to obtain land on the Prairie Provinces. Many of these boys are mechanics and want to become farmers. They have some money and a few of them want to buy land. In cases where they have had experience as farmers

they are promptly taken in hand and given every encouragement. If they are mechanics and want to go to the different cities they are acquainted at with the conditions prevailing in their particular trades.

## Every Fourth Man Has War Claim

Over 21,000 Claims Submitted to the Dominion G.W.V.A.

The flood of claims for adjustment of matters arising from war service which continues to pour into the headquarters of the Dominion Command, G.W.V.A., at Ottawa, has brought to light the remarkable fact that every fourth man enlisted for overseas service during the Great War considered that his balance with one branch of the service or the other had not been properly squared away when he was demobilized. Since the formation of the G.W.V.A. more than 125,000 claims have been submitted through its adjustment services. An average of 35 per cent. of these have been satisfactorily settled. The "Clean Sweep" Campaign undertaken by the association last fall, and which still continues with undiminished energy, has thus far been responsible for the submission of over 21,000 claims, of which an average of 25 per cent. have been settled to the satisfaction of the claimants. An office expert who surveyed the work passing through the Dominion Command Office, recently stated that the staff was less than half that which would be required if the same volume of work was to be undertaken by a well organized government department. He congratulated the Dominion officials upon the smooth operation of the adjustment service, which involves hundreds of personal interviews and telephone calls, beside a tremendous volume of correspondence. More than 40 per cent. of the war service claims received by government departments dealing with such, are submitted by the G.W.V.A. Less than 10 per cent. have been submitted by other veteran organizations.

## Found Them Best She Had Ever Used

WHAT MRS. PARLEE SAYS OF DODD'S KIDNEY PILLS

Sussex, N.B., Woman who Suffered From Many Years of Kidney Trouble Sings the Praises of Dodd's Kidney Pills.

"I am a widow, 52 years of age. I have been suffering from kidney trouble for many years. I have tried many remedies, but nothing has done me any good. I have found Dodd's Kidney Pills the best I ever used."

"I have found Dodd's Kidney Pills of good value to me," Mrs. Parlee says. "I had typhoid and it left me with milk leg. I suffered also from cramps in the muscles, backache, headache and heart fluttering. My sleep was broken and unrefreshing. I was always tired and nervous and I had dark circles under my eyes."

"I took two boxes of Dodd's Kidney Pills and they have done me a lot of good. I have found Dodd's Kidney Pills the best I ever used."

Mrs. Parlee's troubles came from the kidneys. Ask your neighbors if Dodd's Kidney Pills are not the most reliable of all kidney remedies.

Alberta Co-operative Potato Growers

Six New Potato Associations are Being Organized. W. F. Broadstock, secretary of the Edmonton Co-operative Potato Growers' Association reports that there will be at least six potato growers' associations organized in the province during the coming summer. Potato growers at Veteran, Leithridge, Dargyll, Clyde and Rimbey have signified their intention of organizing local associations and will affiliate with the Edmonton organization.

These local organizations will sell their potatoes through the Edmonton potato growers' sales organization and as an association will pay less according to the amount of potatoes that they produce. A fee of 25¢ will be charged for every five cars sold. This is the amount of one share in the Edmonton association and for each share held by a local they will have one vote—Edmonton Bulletin.

Harsh But Necessary Revoluting as it seems for armen to drop bombs on their own people, no government has any choice but to fight when revolution boils up. What things have done in defence of their thrones and Bolshevik rulers have done in defence of their power, a liberal government like that of South Africa must also do when challenged.

General Smuts, who has little faith in the ultimate solution of social ills by the action of the state, looks upon them through force, may be rolled upon when possible to use intelligence in place of bullets.—New York Sun.

To Settle Peruvian Title Sir Robert Borden, former premier of Canada, will attend sessions of an arbitral tribunal at Lausanne, Switzerland, called upon to settle a dispute involving the title of oil producing lands in Peru.

The aborigines inhabiting the Malabar Islands speak to each other at a distance by whistling, the whistlers being selected for their ability to whistle loudly. They make this their livelihood.

## Fur Farming Migration of U.S. Farmers

Western Provinces Offer As Good Opportunities as the East for this Industry

Dr. W. G. Church, Dominion Inspector of Silver Black Foxes for Livestock Branch, Department of Agriculture, Ottawa, Ont., says: "After having personally visited the different provinces of Canada, and studying the situation from every angle, I am convinced that there are wonderful opportunities for this industry in the western provinces. When I say wonderful, I will quote what has been done by one of the eastern provinces, and in a future article will explain why the west has a chance of doing equally as good, if not better work than the east has done."

Everyone recognizes the fact that Prince Edward Island is an agricultural country. They also know that it is an island, and therefore rich in fisheries, and this island is often referred to as the garden of the gulf, and everyone who has visited this island has been willing to concede that this is the proper title, and that it certainly is a garden, and when they investigate the fishing industry, they are also ready to concede that it is also a great source of revenue. For there on the shores of this island are caught the most delicious oysters which command the highest market price, as also do lobsters, clams and many varieties of deep water fish, such as mackerel, cod, salmon and halibut that would swell the revenue from this industry.

Then combining the revenue from both the fisheries and agricultural products, the revenue from the fox ranching industry of Prince Edward Island was as great as the others combined.

Just stop and think of this. I am going to write a series of articles dealing with this industry, and will gladly furnish free of charge any information relating in any way to the industry.

Parties wishing such information are to write me, and enclose a self addressed, stamped envelope for reply.—Dr. W. G. Church, Summerside, P.E.I.

Buy a package today, by its fragrance, Gold Standard Tea.

EDWIN W. FIELD

"I'm convinced if I had taken Tanlac two years ago, when my troubles first began, I would have been saved a world of suffering," said Ed. W. Field, 538 Jefferson St., Milwaukee, Wis.

"My case proved that when a man's stomach goes wrong, everything goes wrong with him. The first thing I noticed out of the way was loss of appetite and next, that no matter how sparingly I ate, I was sure to have an attack of indigestion. I finally got so I couldn't walk a couple of blocks without having to stop and rest and I was so nervous that often I sat up in a chair all night long. "Tanalac has made a new man of me, my stomach is as sound as a dollar and I feel fine all the time. I am a firm believer in Tanlac because I know it delivers the goods."

Tanalac is sold by all good druggists.

### Too Much Unrest

Many Causes Advanced for Present Restlessness in World

Opinions as to the cause of "unrest" so much in evidence vary quite as much as the numerous forms in which the unrest manifests itself. Some of the causes advanced are too much jazz, too much booze, too much lawlessness, too much law, too much restraint on the people, too little restraint, too little religion, too much preaching, too much unemployment, too much laziness, and so on. It seems to be either too much or too little of one thing or another. The only thing on which nearly everybody seems to agree is that there is too much unrest.—Springfield, Union.

### The Accommodating Verger

A new curate wanted to make a good impression. It being his first sermon. He was determined not to neglect his personal appearance. Smoothing his hair, he said to the old verger: "Could you get me a glass? A small one will do."

The verger hurried away, but soon returned concealing something under his coat. "I know what nervousness is," he said. "I've brought you a whole bottle."

The Ganges, India's most important river, 1,557 miles long, and is navigable for a distance of 350 miles from the sea.

### Eager to Get Facts

American Agriculturists Want to Know More About Farming Conditions in Canada

(Special Correspondence by G. O. Porter, of Winnipeg)  
Fargo, N.D.—In point of territory covered this is the most important immigration outpost maintained by the Dominion Government in the United States. Through this gateway streams of emigrants from Kansas, Missouri, Arkansas, Oklahoma, Texas, Mississippi and Louisiana into the Canadian Northwest. E. H. Hewitt is the agent in charge for the Government here and at present his mail brings thirty-five letters daily enquiring about the prospects for farm, fruit and dairying prospects on the prairies and in British Columbia.

During the past three weeks I have traversed the prairie States of Minnesota, North and South Dakota, Iowa, Nebraska, Kansas and Missouri. Not since 1912 have I found such keen interest in things Canadian.

I attended a Farmers' Institute at Colby, Kan., recently. This is the extreme western part of the State. These "institutes" are informal gatherings of farmers where reports are read from Agricultural Societies. Through Agent Hewitt carrying his exhibits to many country fairs in Kansas, the farmers have a very accurate knowledge of the conditions on the Canadian prairies. These people are eager to get facts. They are familiar with scientific soil culture.

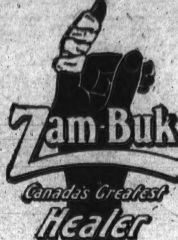

To tell one of these men that a given farm produced so many bushels to the acre is to invite such a multiplicity of questions that only a soil expert could answer. Jacob Mohler, Secretary of Agriculture for Kansas, says that for the first part of April his office has a considerable number of prospects for the Canadian Northwest who will go up to "see out the land." Most of these agents would rather have a "prospect" make a trip over the line before he tries to decide on location or details of any kind. Mr. Mohler, in talking to me, remarked, "I have known of many men who went to Canada and prospered and then I have heard of some who came back dissatisfied. It is to avoid these dissatisfied ones that agents are now working."

A Foe to Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatment with Dr. Kellough's Asthma Remedy and it will fall back ever faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the most breathing passages of the lungs and leaves no trace of the trouble to lurk. Have it by you for ready use.

Train Boyhood of Canada Speaking at Hamilton: Lord Byng said that while it was easy to offstage as a servant of the King, it was a difficult task to represent him.

"There are one or two things with which a Governor-General may possibly identify himself, and one is the boyhood of your great Dominion." It would be his ambition in five years of service in the Dominion to make the boyhood of Canada into the Canadians.

Whistling Tree The "Tasafar," or whistling tree of South Nubia, is so called from the flute-like sounds made by the wind in its branches. The sound is caused by the holes bored by an insect in the sap of the branches.

The Wonderful herbal balm for Injuries & skin diseases. 50c. all dealers.

### Historic Knife

The Camarvalet Museum recently received what is said to be the knife of the guillotine used in Paris during the French Revolution and the subsequent Reign of Terror and which served to decapitate Louis XVI., Marie Antoinette, Robespierre, and thousands of others. It was a gift to the museum from a Belgian collector. The relic is said to have been in the possession of the family of Simon, the famous executioner of the French Revolution, for several generations.

### BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and overcome the stomachic troubles, such as constipation and indigestion, colds and simple fevers and making the child easier. Concerning the Tablets, Mrs. Saluste Pelletier, St. Dumas, Quebec, writes: "I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The drug contained in the mesal catgut button produces in the user visions of gorgeous sunsets.

### CATARRH

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic, taken internally, acts through the blood, the mucous surfaces of the system. HALL'S CATARRH MEDICINE restores Nature to restoring normal conditions.

Dr. F. J. Cheney & Co., Toledo, Ohio.

Turkey has a government agricultural bank with a capital of nearly \$15,000,000.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Claiming that music of all kinds is harmful to morality, the mayor of a certain town in France has ordered the suppression of all pianos and photographs in his commune.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Rosin Has Become Valuable New Uses Found for a Practically Worthless Product

Many articles in daily use came originally from the ground, but few realize that "mineral" rosin has been a thriving industry in the United States for many years, despite the fact that rosin is the product of the sap of certain species of evergreen trees.

Half a century ago rosin was so cheap that it did not pay to put it in barrels and send it to market. The barrels were worth more than the rosin. Turpentine, however, brought a good price and came from the same sap which yielded rosin as a by-product. In consequence manufacturers concentrated on the turpentine and allowed the molten rosin to run into pits, where it hardened and was covered with earth to get it out of the way.

This went on for some twenty-five years, and meanwhile the value of rosin went up because new uses were found for it, principally in the soap and paper industries. For a time people forgot about the tons of valuable rosin lying buried on the site of the old turpentine distilleries, but by and by a group of enterprising manufacturers began to work these rosin "mines." Of course these buried supplies will eventually be used up, and then people will have to turn once more to reducing rosin from pine gum.

### Speed of the Tortoise

Takes Nearly Four Years to Travel One Mile

A professor at Wisconsin University in America has been playing a jolly game with tortoises. He has discovered, by letting loose 166 tortoises all labelled, that a tortoise takes four years all but a few days to cover a distance of one mile.

The professor also noticed that in a period of five months the 166 tortoises went a distance of 115 yards, thus making their average speed about two feet in one day.

Travelling at that rate, a tortoise starting from London would take nearly a century to reach Edinburgh.

### A STUDY OF OLD AGE

Is always interesting, and reveals the fact that the blood is usually thin and lacking in the strengthening properties of young folks blood. If you want to fill your blood with the fire of youth, build up your strength, store your nerves, just use Dr. Hamilton's Pills. This wonderful medicine keeps the system in regulation, keeps the bowels in good condition, keeps the body free of waste and impurities. It is the most reliable and safe of Dr. Hamilton's Pills is recommended, 50c at all dealers or The Catarthosone Co., Montreal.

### Blocked Doorway at Hampton Court Opened

Haunted Chamber Has Been Closed

For 187 Years

After having been closed for 187 years, a blocked-up doorway at Hampton Court Palace has been re-opened. It connects Henry VII's so-called Watching Chamber and the well-known Haunted Gallery. Through it have passed Shakespeare, Charles I., Queen Elizabeth, Mary Queen of Scots, Oliver Cromwell, and a host of other historical personages. Catherine Howard, one of Henry VIII's consorts, passed through it on her way to the scaffold.

Shakespeare's company performed plays in the Great Hall of Hampton Court Palace at Christmas, 1603, and the rehearsals took place in the Watching Chamber.

A feature of the "Haunted Gallery" was a picture of the "Wild Man and Woman," brought by Martin Frobenius from America which is supposed to have given Shakespeare his first conception of Caliban.

The doorway was closed by King George II. in 1725, who had the gallery turned into a habitable room.

For years Mother Graves' Worm Extremator has ranked as a reliable worm preparer and it always maintains its reputation.

A showup, back motor truck accompanies clowns and other travelling organizations.

Minard's Liniment Relieves Neuralgia

Happy Thought

The editor of the London Times alluded in a recent article to the distinction between "news" and "views." Some papers, he said, are news papers; others tended to be news papers. This gives us an idea. Why not call church bulletins, newspapers; footstep journals, shoespapers; sailor's sheets, crewpapers; poetry prints, musepapers; journal footstep papers; others tended to be news papers, and so on and so on. We really ought to patent this.—Boston Transcript.

### Self Preservation—Nature's First Law—Heed It!

Preserve Your Strength

Tillsburg, Ont.—"Ever since I was a child, I have been troubled with asthma. Dr. Pierce's medicines were used in my family at home and they never failed to give good results. The 'Golden Medical Discovery' was used as a tonic and blood purifier also for bronchial trouble and it proved excellent. I myself have recovered from bronchial trouble and Dr. Pierce's Favorite Prescription to build me up when I was run down, and they were both very beneficial."

"I feel safe in recommending all of Dr. Pierce's medicines knowing them to be good."—Mrs. Clifford Mitchell. Obtain these famous medicines now at your nearest drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeport, Ont., for trial package of any of his remedies. Write Dr. Pierce, President, Hotel in Buffalo, N. Y., if you desire free medical advice.

### How's Your Liver?

Health Is Kept, If You Observe This Hint, please. I have taken Dr. Pierce's Golden Medical Discovery for liver trouble and found it excellent and would not be without it. I suffered from congestion of the liver about six years ago and I always say that this medicine cured me. I have also given it to my family for colds and it cured them in a very short time."—Mrs. Susan Mitchell, Box 129.

NEVER COOK UP COLD MEAT WITHOUT IT

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and doses worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism  
Toothache Neuralgia Neuritis  
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade name registered in Canada of Bayer Manufacturing of Monach, acetylsalicylic acid. While it is well known that Aspirin means Bayer Aspirin, the public should be advised that the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

### World is Like Japanese Lantern

Bulges Under Pressure of Sun and Moon Says Prof. Evans

"Greenwich has apparently drifted as much as half a mile toward the equator in the last 18 years." This is a declaration by Prof. J. W. Evans, famous astronomer. "Naples is one-third of a mile south of where it was 15 years ago," adds Prof. Evans, "and between 1872 and 1913, Cambridge, Mass., moved 26 feet away from Greenwich, England."

Prof. Evans adds that experiments show that the earth bulges under the pull of the sun and moon, in an up and down movement of about 18 inches.

"The world is like a Japanese lantern," he says. "It tends to telescope if the poles are pressed toward each other stoutly, but resists pressure to other directions."

### Just Needed Studying

Clock Was All Right If You Understood It

The cleaning of the big clock on the English House of Parliament reminded a story teller of his grandfather's clock, which he frequented very highly in his Gloucestershire family. The ancient in whose house it stands tells visitors that nobody in the household understands much about it except himself. Though the clock, he insists, is a good time-keeper. "It only wants studying a bit," he says. "You see, when the hands stand at 12 it strikes 2, and then I know it is twenty minutes to 7."

### Canada as a Dependency

Realization of Fact Means Better Citizens Declares Eastern M.P.

Speaking to the Reform Club at Montreal, W. F. Carroll, M.P. for Cape Breton South and Richmond, deprecated the talk that Canada was a nation and insisted that such was the case even though we have all political and religious freedom. "We are not a nation," he said, "and the quicker we understand ourselves, the sooner we will become better Canadians. We are a dependency of the British crown. Nationhood implies the right to make treaties and settle our own differences. If you want proof that we are not a nation, look at the privy council. Not a bill becomes law until it is sanctioned by the King in the person of the Governor-General." He believed that nationhood would develop greater statesmen. In conclusion, Mr. Carroll said:

"I am not talking with a view to independence or with a view to severing our connection with the mother country."

In China are to be found in circulation, lumps of gold and silver bearing marks which show that they were first issued hundreds of years ago, in shape they are square, oval or oblong, and they weigh anything up to one and a half pounds.

Bodges, symbolical of their name, are being supplied to many ships of the British navy.

THE CUTLER LABORATORY The Name "Cutters" is on every bottle. No Spurious, Varieties and Advertisements. Made by The Laboratory that Knows How. "After five years of color analysis, the Cutler Laboratory is one of the best in the world." The Cutler Laboratory, Berkeley, U.S.A. (U.S. License) California

### CHICKS

No need to lose chicks. Raise every one into a strong, profitable bird. Successful poultrymen everywhere back up.

Pratt's Buttermilk Baby Chick Food

Sold everywhere on our money back guarantee. ADVISE PRATT FOOD CO. of CANADA, LIMITED Toronto

Almost as Easy as Wishing Your breakfast cup is ready without trouble or delay when

INSTANT POSTUM is the table beverage.

To a teaspoonful of Instant Postum in the cup, add hot water, stir, and you have a satisfying, comforting drink, delightful in taste—and with no harm to nerves or digestion. As many cups as you like, without regret.

"There's a Reason"

Your grocer sells Postum in two forms, POSTUM CEREAL (in packages) made by boiling half 20 minutes. INSTANT POSTUM (in tins) made instantly in the cup by adding hot water.

### THE FARMER'S INTEREST IN ALBERTA FOREST PATROL

Forest patrol in Southern Alberta is of greater importance than the patrol of most forest areas. The object is not principally the preservation of timber but the preservation of our agricultural industry.

First, because the loss of these forests would make our climate drier.

Second, because the loss of these forests would greatly reduce the waters available for irrigation.

Our climate until recent dry years was one ideal for grain crops.

We had plenty of rain in May and June.

dry weather in August, September and October. Scientists tell us rain is produced by the chilling of the air.

compelling it to give up moisture it could not hold at a higher temperature.

Our spring rains, when we get them, are produced by the conglomeration in the air blown against the snows of the mountains by east and north winds. When these winds prevail the chilled air spreads back further east and the rain covers a greater area. The snow preserved from rapid melting by the forests is our condenser. Remove the forests and the snows go out in April; remove the condenser and our rain ceases.

Irrigation will be developed within the next twenty years to the limit of available water. Already systems are in use which depend on the storage of flood waters. Remove the forests from our watersheds and, not only will the snows be diminished by the mild spells of winter, but the spring melting will be much more rapid, our water will go over the dams instead of into our reservoirs, and the waters for irrigation will be inadequate. Our springs and underground water supplies all depend on the waters conserved by the forest areas.

Owing to dryness and strong winds of Alberta's climate fires are a greater than usual menace to our forests.

About one-third of the area has already been burned out.

Forest areas in mountainous districts such as ours when once burned over suffer severely from erosion.

The steep slopes are quickly deprived of their shallow soil by the rush of water resulting from storms. Deep channels are cut which result in more rapid drainage and especially in a comparatively dry climate like ours insufficient moisture is left to support the growth of new trees. Experts state that such an area burned over twice is impossible of reforestation.

Owing to the mountainous nature of the forest area of Southern Alberta, patrol by rangers to be effective would be extremely expensive.

Fires might originate within a mile of a ranger and never be discovered till they were beyond control.

The record of the air patrol during the last two years speaks for itself in regard to how effective it has been.

In 1920 the station was started at Marley and for two months the Bow River Forest Reserve was patrolled as far north as Clear Water River.

About 10,000 square miles were observed daily and the average distance of flight each day was about three hundred miles. Probably largely due to the moral effect of the patrol upon campers and others, no fires broke out within the reserve, though several were reported outside the reserve and several occurred in the Crows' Nest Reserve, which was not patrolled that year.

The Forest Patrol of 1921 was conducted from High River and both the Bow River and Crows' Nest Reserves patrolled daily excepting when weather made flight impossible. 25,000 square miles were observed each day and the average day by flight was about six hundred miles. The total distance for the seven was about seventy-two thousand miles; total fires reported fifty-one. No fire got beyond control excepting the Allison Creek fire which originated in British Columbia many miles from the patrol area and was reported by the patrol three days before it entered Alberta.

During the flight to extinguish the fire the planes for days furnished the only available information regarding the condition of the fire in a great deal of area covered by it.

The moral effect of the patrol upon campers and others in our forest area is undoubtedly very great and the reports from the planes record all camps observed and all movements of campers.

The patrol will now be assisted by the radio-phonograph, instead of by wireless telegraph, making it possible to use one-man planes at considerable less expense and risk and also make it possible to have rangers posted long distances from the commercial phone, where, by furnishing them with a small receiving set and by their being in attendance at fixed hours during the day, any fire in the neighborhood can be reported direct from the Air Station.

The patrol will now be assisted by the radio-phonograph, instead of by wireless telegraph, making it possible to use one-man planes at considerable less expense and risk and also make it possible to have rangers posted long distances from the commercial phone, where, by furnishing them with a small receiving set and by their being in attendance at fixed hours during the day, any fire in the neighborhood can be reported direct from the Air Station.

During the flight to extinguish the fire the planes for days furnished the only available information regarding the condition of the fire in a great deal of area covered by it.

### STRIKING ON THE JOB

We hear it on the train car, and we hear it in the shop.  
We hear it on the corners, and at every place we stop.  
We read it in the papers till it almost makes us sob—  
"The way to feed the hungry is to strike upon the job."

For children who are hungry, and for all who are in need,  
For anyone who suffers we have sympathy indeed;  
We have no use for autocrats or any kind of snob.

But, to tell the truth, we can't agree with strikers on the job.

For we've been thinking lately of one who never strikes,  
She never thinks of throwing her sabbots in the works;  
She never draws a pay check like Jack or Jim or Bob.

But you never hear her speak of striking on the job.

She's first up in the morning, and she's last in bed at night.

She sees that all are safely housed and then puts out the light;

She has the breakfast ready 'fore you turn your bedroom knob.

And the last thing she thinks of is striking on the job.

You never see her idle, she's always on the go—  
Just washing dishes, getting meals, or mixing up the dough;

Or maybe she's darned socks or shining up the hob.

At any rate, I tell you she's not striking on the job.

We hear it morn'g, night and noon, it's talk of sabotage—  
(We certainly agree with you about that living wage).

But yet we can't help thinking—life won't be worth a bob.

If MOTHER takes a notion to go striking on the job.

—M. N.

Gloucester, 30th March, 1922.

### RED CROSS NOTES

One city and six country schools where there are branches of the Junior Red Cross have won the medal offered by Lieut-Gov Brett for obtaining their quota of funds for the support of the children's hospital which is being opened in Calgary this month.

The junior units are responding to the call in the most enthusiastic manner and nearly all of them have entered the competition.

They must obtain a sum equivalent to \$1.00 per capita, the whole of which will be used for the support of the hospital.

The sick and crippled children from all over the province will be looked after at this institution by the Junior Red Cross.

The following are the schools which have already obtained their quota: Alexandra school (Calgary); Penhold School; Fishburn School; Holmstead school, Green-shields; Bathgate School, R

## Electricity On The Farm

A Vision of Manitoba in the Near Future

To many the idea of a farm, worked by electricity, is utopian and merely a fantastic dream. In the face of the setbacks of the past few years its realization seems hopeless, but let us look a little more closely into the situation as it appears to one following the developments of the last decade. No doubt the vast of Manitoba farms at the present time would produce very similar statistics to the four Indiana counties where we find the statement that 15 hours work a day, is the average lot of the farmer's wife that 81 per cent. of farm homes carry water into the kitchen by hand, that only 6 per cent. have bath-tubs, only 3 per cent. electric lights, but 96 per cent. of the farmers have automobiles.

In an automobile to compensate for all that drudgery. Compare her lot with that of the modern farmer's wife in Iowa and Ohio. Running water at all times, electric cooking ranges, motor driven sewing machines, electric irons, electric vacuum cleaners, electric toasters, electric washing machines, in fact anything that electric power will drive. What was the condition which brought about the change? Just this. The farmer found that it paid to have an electric motor drive a milking machine and do the work with one maid in less time than it takes three men to do it by hand. In addition the cost of installation was less than the first year's savings in wages. That was the starting point. The same electric power could be used to run a feed cutter, to supply water to the barn and incidentally to the home, to shell and grind his corn, to thresh grain, to separate milk, churn butter, groom horses, and work a host of other applications even to the stuffing of sausages.

Here in Manitoba the problem must be approached in some other way as the utility is state owned. It is, however, in the unique position of being self-supporting. The Manitoba Electric Commission was established in 1919 under authority of an act passed by the Legislature of Manitoba with the object of supplying electrical power throughout the province. The chief engineer has his headquarters at the Parliament Buildings in Winnipeg. Since the appointment of the commission about 120 miles of high tension transmission line have been erected, supplying power to the city of Portage la Prairie about 60 miles west of Winnipeg, and the branching south about 60 miles to the towns of Carman, Roland and Morden. The city of Winnipeg hydro electric system supplies the power at 66,000 volts. Two other towns, Virden and Minnedota, have isolated electric power plants. The commission realizes that, with the province covering such an extensive territory, with towns so widely separated, one long transmission system would be economically almost an impossible problem, but it is its ultimate aim, when conditions improve, to supply, through direct from the main hydro-electric plant at Point du Bois, and from there radiate to the various townships.

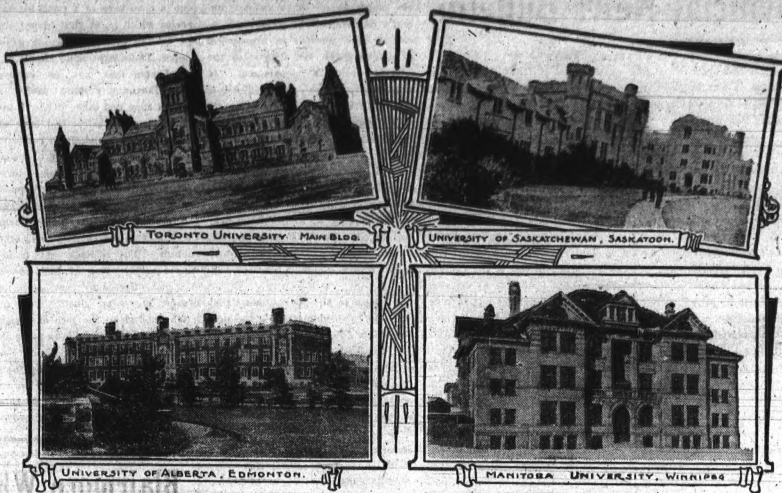

Now, where does the farmer enter into this, you may ask? At the present time nowhere, but he realizes that crossing his property or close to him is the chance to revolutionize his farm life. In the last few years electrical men have been busy perfecting a gear which can be installed and operated in the open air, as well as transformers which can be depended on to reduce the pressure from the high tension lines to a safe pressure for working a farm plant. The actual motors need no attention by skilled hands, the control being of the simplest.

In the next few weeks wireless telephone messages begin to be broadcast from Winnipeg by one of our local papers. A comparatively inexpensive receiving set may be installed on any farm and bring the farmer into immediate touch with world events. No longer need he be isolated from music, but may enjoy the same comforts as men living in the city. It was only a year or two since this feat was made possible with low powered transmitting sets, and if electricity can add to the brightness of our lives in one form, the time is not so far distant when electricity in another form may make the work of a farmer's life as easier and more attractive one—J. M. P. Wilson.

### The Land of Liberty

The incoming ocean liner was proceeding up the bay. "What is that island on the left with the statue on it?" asked the immigrant. "That's Bedloe's Island and the Statue of Liberty," explained the steward. "And what is the other one over there?" asked the immigrant. "That's Ellis Island, where you'll be locked up," replied the steward—New York Sun.

W. N. U., 1915

## NATION BUILDING IN CANADA

### Universities to Follow the Railroad in Binding East and West Together For the Cause of National Unity

Hand in Hand with the material growth of Canada, with the extension of her population, and the development of her natural resources, moves forward the current of her intellectual and spiritual life. The race of men and women whose adventurous spirit and indomitable courage are making a nation, are not the kind that are content with the merely material things of life. Canada's pioneers of a little while ago were young men who saw visions, and old men who dreamed dreams, and their sons and daughters are no less gifted. Their broadening horizon now includes a new world of mental and spiritual effort in which they, in turn, must be pioneers. The realization of this fact has become a living force in the line universities that are already doing a great work at Winnipeg, Edmonton, Saskatoon and Vancouver.

In the making of the Canadian nation so far, avenues of transport and communication have worked towards completion of the structure of the foundation stone of which was the Act of Dominion Federation. Canada's national unity is founded and fostered by the political and physical links that bind east and

west, but it can be fully developed, only when the avenue of Canadian thought move east and west as do those of trade. This is the thought that lies behind the recent donation of the C.P.R. of three annual scholarships of the value of \$500 each to Toronto University for the purpose of inducing graduates of Western Colleges to complete their studies at that great Canadian center of learning.

The universities of Western Canada are growing fast. Their standard of instruction is high, and an ever growing number of their students desire to pursue post-graduate studies beyond the stage now possible at their

provincial institutions. Through these scholarships a constant stream of the brightest and most ambitious of western university students will be enabled to spend some time in Eastern Canada, and thus become familiar with methods of life and thought there. As stated by Mr. E. W. Beatty, president of the Canadian Pacific Railway, in his letter to Sir Robert Falconer, President of Toronto University, announcing the granting of the three scholarships, "The movement is one that will obviously be of benefit, not only to the students, but also to the communities in which they will afterwards live."

The history of this interesting machine represents a triumph for British aircraft engineering, and dates back to last summer, when the "Bamel," having been designed and constructed in the remarkably short space of one month, first made her appearance to the public by flying in and winning the Aerial Derby at an average speed of 163 miles to the hour. The opinion was hazarded by experts that this was the fastest thing existing in the way of aircraft, but it was not until the end of the year that she was able to prove the experts were correct in their surmise, and now she can claim definitely to be the proud holder of the world's speed record.

The man who designed this record-breaker is H. P. Pollard, whose best-known machines are probably the famous S.E. 5 biplane, large numbers of which were used by the Royal Air Force in the war.

The man who cleared the machine at the phenomenal speed of 212 miles per hour is J. H. James, a pilot of great experience, before and during the war, and the engine which gave the very necessary power to propel her is a 450 horsepower Lion. It thus will be seen that this truly wonderful performance was essentially an all-British one.

Limited Liability  
Among the witnesses called in a trial in a southern court was an old dorky.

"Do you swear that what you tell shall be the truth, the whole truth and nothing but the truth?" intoned the clerk.  
"Well, sah," returned the witness, shifting uneasily. "Dis lawyer gemmen kin make it a pos'nal tot, easier on hisself 'n relieve me of a mighty big strain of he'll leave out anything about gin 'n chickens. 'Ceptin' for dose, Ah guess Ah gin stick to de truth."

The rainiest spot on earth is the Walpo Valley in Hawaii, where the precipitation averages one inch a day. The district of Huailan, on the same island, has a rainfall of but twenty inches a year.

Coal Deposits in Prairie Provinces  
The coal deposits in the prairie provinces, chiefly Alberta, amount to 1,182,000,000 tons, according to C. V. Corless, president of the Canadian Institute of Mining and Metallurgy. That is one thousand one hundred and thirty-two billion tons, an inconceivable total. Alberta has been employing about 10,000 men in mining and her production last year was about 5,500,000 tons.

Victory Must Remain in Dock  
The examination of Nelson's famous flagship, "Victory," which was ordered by the British Admiralty several weeks ago, shows that owing to signs of decay the life of the ship could be prolonged only a limited period if she were kept in the water. Therefore it has been decided that the ship will remain in dock at Portsmouth, where she is now lying and where she may still be viewed by visitors.

Muskat Farm for Ontario  
A muskrat farm will shortly be established at Newboro, Leeds County, Ont., by Dr. G. E. Richards. Dr. Richards has leased a large bay in Newboro Lake in the Rideau chain, and in the spring intends to enclose it with wire fencing, where muskrats will be bred. He has also commenced a black fox ranch at the same place.

Insects in Sewerage Works  
The treatment of sewerage has become a highly scientific business, and one of the most interesting features of it is the use of lovely forms of life for the purification of the material. A British chemist suggested some time ago the use of a certain tiny and prolific insect for cleansing the material of sewerage filter beds. Recent experiments in Great Britain have proved the possibility of colonizing filter beds with these insects.

Ditched  
"And you say you lost control of your car?"  
"Yes. I couldn't keep up the installments."—Judge.

Advertising Alliteration!

## What You've Lost

When Life Was in the Open—Healthy and Glorious

The oldest, most successful company in the world is a Swedish firm. Its letterhead announces that it was founded in the year 1235.

The name of the company is Stora Kopparbergs Bergslags Aktiebolag. The name itself is formidable enough to withstand the storms of seven centuries. Translated it means The Great Copper Mountain Mining Company.

This oldest company, has many interests. Primarily it has always been a miner and refiner of copper.

Today it has scientific management in the third degree. Its welfare activities for its employees include hospitals, libraries, baths, schools, co-operative stores, recreational centres, children's summer country homes and garden plots for the workers' homes.

In a sense, modern civilization considers these things the most important. Yet it is doubtful if the company's employees are as happy as its employees of many centuries ago, when the miner juggled his ore away from the mine and smelted it in his home. We have gained a lot of things by our modern industrial system. Also, we have lost a lot.

The age of alarm clocks, time clocks and system keeps us caged in offices and shops which our ancestors would have considered prisons.

Our great-grandfathers felled trees, made clearings in the wilderness, built log cabins. Muskets balls moulded at an open fireplace, brought them venison, wild turkeys and other game.

Tanned deer skin and spinning-wheels colored the clothing problem. Forests yielded free fuel.

Great-grandfather had to chop the firewood, and he had to work a few hours a day in his garden. But his beloved home was in sight at nearly all times, and of course he killed and ate what he was wildered axe and hoe.

Life was in the open—healthy, glorious with birds singing by the thousands and sweet woodland scents filtering through the sunshine on the pure.

We eat out of a tin can and a cold storage plants now. Our water is treated chemically to kill germs. Spinning-wheel and deer are gone; clothing eats into our pay. Forests are nesting extinction and sooty coals like sixty.

All is system—methodical, this regulated, that prohibited. Such is progress. And the ultimate goal is—what? No one knows. Apparently, the goal of our happiness and health—Calgary Albertan.

## The Secret of Youth

French Professor Advocates Intervals of Rest for Brain

"Empty your brain," the learned French Academic of Medicine endorsed this method of retaining youthful health and vigor, after Professor Gueniot, one of the prominent members of the Academy faculty, submitted a lengthy report demonstrating the brain must be cleared of various maladies it has effected.

The simple prescription above is declared by Dr. Gueniot to have been particularly effective in treatment of high blood pressure, heart trouble, indigestion, nervousness and brain disorders. The remedy consists of spending from ten to fifteen minutes of each day in perfect repose. Every muscle in the body should be completely relaxed. The brain must not be permitted to function during this period, one must "absolutely cease thinking."

According to Dr. Gueniot, this latter phase of the treatment will prove impossible for more than a minute at a time at first, but with practice, one should be able to empty the brain completely for fully ten minutes at a stretch.

This, he declares, will prove to be worth more than eight hours sleep, and is the secret of many old men's youth and the unbelievable energy of many millionaires.

Considerate of Her

A country woman came to the platform of the railway station at Chertsey.

"Do trains start here for Virginia Water?" she inquired timidly of a passing porter.

"Yes, missus," he replied. "What time do you want to go?"  
"When it's permitted to the train," she answered, with much politeness and a look of surprise at his question.

Advertising Alliteration!

An advertisement assists all ambitious aspirations and accompanies adequate activity, as all active advertisers admit; as advertising aids accomplishments and attracts attention, alluring as ably as attracting, all ambitious aspirants are active advertisers. Alliteration and amen!

One ton of wheat straw will produce the equivalent of forty gallons of gasoline, according to the U.S. Department of Agriculture.

# The Weekly Provincial News Bulletin

Edited by the Publicity Commission,  
Government Buildings, Edmonton.

## Road Program for Year

Following conferences with various road engineers of the provincial government, Hon. Alex. Ross, minister of Public Works has announced plans for road building under the new Highway Act for the coming summer. The new organizations will involve several important changes.

The services of forty road foremen who were doing duty under the old system, will be dispensed with entirely. The roadwork will be under the supervision of practical road engineers, well qualified for the work. The system of road foreman will disappear. This will afford a very large saving in administration since the work of the road foreman in the past simply duplicated the work of the foreman engaged by the municipalities themselves. The money thus saved will be utilized on roadwork generally.

The province is to be divided into ten districts with a road engineer resident and in charge of each district.

Plans for carrying out the work this year may be summarized as follows:

The proposed Highways Commission will not be appointed for some time. The appointment of the Highways Commissioner is still under consideration, there being many applicants for the position.

Main Highways—These will continue to be built and developed as before. One road engineer will be placed entirely in charge of main highway work, since this work has grown to very large proportions. There are now 3600 miles of main highways in the province. This includes main highways running eastward from the C. and E. to a main highway north of the province, a main highway north and south through the province, and main highways northwest of Edmonton, west of Calgary and west through the Crow's Nest, and other main roads.

Municipal Roads—All roads within the municipal districts must be built by the municipalities themselves, under supervision of government road engineers. The grants will be paid these districts by the government, but not until the roads have been built according to a certain standard, and approved by the government engineer in the district.

In local improvement districts or unorganized territories the government will have charge of building the roads, which will be done under the supervision of the engineers.

It is the purpose of the government to encourage market roads, thus extending the facilities of farmers in marketing their produce.

The question of securing the federal grant for highway is still under review by the government. In order to get as early a start as possible on the roadwork, the road engineers have now returned to their various districts and are making preparations for the summer's work.

Commissioner Alfred Cuddy, who since 1919 has been Commissioner of the Alberta Provincial Police, has resigned that position to accept the position of Assistant Commissioner of the Ontario Provincial Police.

At the Calgary spring cattle show this year 355 bulls were sold at an average price of \$111.17, and a total value of \$39,645.00.

The new government farm just north of Edmonton which will be in connection with the new home for mental defectives, is to be under cultivation this year. Of the 1000 acres included in the farm 400 will be cultivated this year.

The Holstein herd at the Stony Plain farm will be moved to this farm, and later the poultry demonstration plant, so that when the new home for mental defectives is constructed, there will be a ready supply of the best milk and eggs, two of the chief articles of diet for patients in such a home. Work on the new home is to start this year.

Announcement has been made that one of the schools of agriculture, Lacombe and Gleichen, the two most to be established, will be closed temporarily, owing to the small attendance at these schools. It is also announced that the department of agriculture will reduce two or three of the demonstration farms to experimental plots, the larger portion of these farms have already been sold. Steps have already been taken to dispose of some of the demonstration farms at Stony Plain. The department, however, will put these farms in crop this year. The reduction of these farms to experimental plots is in line with the general policy of appointing agricultural district agents at each place where a demonstration farm is located. The superintendent will be continued, but in the capacity of agricultural agent, who will visit the farmers in the district, and will help them solve their own peculiar problems right at home. In addition, sufficient ground will be retained at the demonstration farms to carry on certain experimental work. More district agents will be appointed at different points in the province.

Attendance at the agricultural schools, each of which have a capacity of 150 students, was as follows for the year 1921: Olds 114, Raymond 56, Claresholm 49, Vermillion 15, Youngstown 41, Gleichen 32.

Members of the equalization assessment board of the province have taken up their headquarters in the provincial parliament buildings, and are engaged now in planning a program of meetings at which they will hear appeals from the equalized assessments of the rural districts towns and villages throughout the province. This equalization board was completed and the report issued last year.

Already a considerable number of appeals have been received, chiefly from Southern Alberta. These are now being gone over by Messrs. Jackson and Donahoe, the two members of the board who will do the investigating and will hold sessions at various points to hear appeals. The other members of the board who assisted in the equalization of assessments were J. H. Lamb, deputy minister of municipalities, who was chairman, Sam Perrie, of Edmonton, and W. D. Spence, who is now tax commissioner of the province, and will likely not act any further on the board.

The office of the recorder of brands for the province is being removed from Medicine Hat to Edmonton and will be located in the old legislative buildings near the capitol buildings. James Wilson, brand recorder, will make arrangements shortly to move his staff. This office has been located in Medicine Hat since the early ranching days, but with the increase in the livestock industry in the northern part of the province it has been found advisable to centralize the office.

**Farm Operations**  
Work on the land was started in several localities of the province last week, and in some places seed was put in, but the heavy snowstorm of last week put a temporary stop to operations. The wet snow, which fell very heavily in the south, and also to a certain extent in the north, has added much needed moisture to the soil.

**Returns to the Legislature**  
Returns asked for during the latter part of the legislature are now being completed and compiled for printing in the journals of the house. Answers to questions of members returned during the last week of the session included the following:

In response to R. C. Marshall, Calgary—Hail insurance policy guaranteed in 1921 totalled \$1,700,000. Of this, \$136,000 in notes remained uncollected, and \$500,000 was paid off, leaving liability of \$1,064,000.

In response to Mr. Claypool, Didsbury—The A. & G. W. paid the Northern Construction Co. \$1,749,447.82 for work. The basis of cost was stated to be 73 per cent higher than similar work done by other railways. Unit prices in the contract were exceeded from 6 to 67 per cent.

The loss on the contract was thus estimated at \$454,000. It was stated also that the A. & G. W. lost \$70,000 in revenue providing the Northern Construction Co. with free transportation over its lines and also lost \$75,000 by providing the contracting company with free transportation over foreign railways, for materials, etc.

In response to Mr. Milnes, Claresholm—Total salaries paid last year \$3,556,610.56, the total bonus paid was \$193,565.25, with \$35,005.03 in the phone department, including wages and overtime in the phone department.

In response to Hon. C. R. Mitchell—A total of \$31,203.56 has been paid out on the special audit being conducted for the government. The principals of the auditing firm doing the work are paid \$3 a day, the seniors \$21 a day and others \$14 a day.

In response to Hon. Mr. Mitchell—Agricultural agents in 1920 totalled 4 and in 1921 there were five. Total salaries paid in 1920 to these was \$5,321.17 with expenses totalling \$2,135.11, and salaries in 1921 totalled \$8,888.41 with \$2,774.32 expenses.

In response to Mr. Milnes—Eighty six per cent of the student body of the University are Alberta residents, and 162 Alberta born. There are 32 professors, including deans employed, 14 assistant professors, 11 associate professors, 25 lecturers, 5 instructors, 4 with part time, 25 demonstrators part time; there are 13 employees in the extension department.

In response to Mr. McKee, Lac Ste. Anne—The gasoline boat "Moberly" purchased in July 1921, for services on the Clearwater river from end of A. & G. W., to McMurray, cost the government \$4,107.45; the operation of the boat cost \$1,057.65 and the total revenue received was \$9.00.

A return to Mr. Milnes as to expenditures on demonstration farms shows the following figures:  
Capital expenditure from 1911 to 1921: Athabasca \$20,118.72; Claresholm \$26,694.73; Gleichen \$35,494.07; Medicine Hat \$32,984.50; Olds \$69,264.69; Raymond \$66,496.87; Sedgewick \$51,977.79; Stony Plain \$65,104.36; Vermillion \$59,566.11; Youngstown \$59,591.12 Total \$512,492.45.

Expenditure on income account for all farms, including head office as follows: 1911—\$10,835.43, 4 farms 1912—\$36,990.89, 7 farms 1913—\$82,620.58 1914—\$66,837.14, 1915—\$70,231.95 1916—\$59,235.29, 1917—\$57,966.76 1918—\$75,645.66, 1919—\$81,762.76 1920—\$72,235.82, 1921—\$61,674.96

The revenue from the farms for the years from 1911 to 1921 was as follows: Athabasca \$10,324.05; Medicine Hat \$50,410.83; Claresholm \$57,432.66; Olds \$47,282.40; Gleichen \$1,156.50; Raymond \$5,070.19; Sedgewick \$55,693.16; Stony Plain \$54,501.55; Vermillion \$46,544.19; Youngstown \$4,038.11. Total \$333,291.75.

A return to Mr. Backley, of Gleichen shows that the liquor stock on January 1920 was valued at \$73,754.00, and stock of January 1921 was valued at \$62,697.36. Amount of liquor purchased by the government since August 1921 totalled \$54,649.95. Salaries to drug store inspectors during 1920 totalled \$10,863.25 and in 1920 totalled \$14,642.42. Salaries to billiard hall inspectors in 1920 totalled \$5,124.96 and in 1921 totalled \$1,560.22 for part year.

A return to Mr. Milnes shows that the government in 1921 paid \$39,332.98 for legal services made from the employees of the Attorney-General's department. Such services included legal services in prosecution of special cases, etc. Agents of the Attorney-General's department in prosecutions were paid \$27,838.42 during 1921, and in the police courts of Edmonton and Calgary agents of the Attorney-General were paid \$3,365.00.

E. B. Cogswell, crown prosecutor, Edmonton, was paid \$7,106, and Jas. Short at Calgary paid \$6,970.00. The appointment of R. A. Smith as general solicitor for the department will obviate much expenditure in this way in the future.

A return to Mr. Milnes shows that the total assessable lands in the province is 35,205,748.81 acres, of which the equalized value for assessment purposes is \$202,256,069.71 an average per acre of \$15.49. The supplementary revenue tax on the total acreage of farm and ranch lands was \$1,204,512.14. The revenue on leased lands is not yet available. The same return shows that in 1921 there was voted \$50,000 for main highways maintenance and \$115,912.83 was spent; for main highway construction there was voted \$1,000,000 and \$625,940.55 was spent; for local and district road maintenance there was voted \$300,000, and there was spent \$63,364.23.

A return to Mr. Buckley shows that at the "Cow Bill" there had been loaned to March 15, 1922, a total of \$1,799,322.00 and there had been paid a total of \$401,617.23. The outstanding principal to this date was \$1,397,704.77, and the outstanding interest was \$93,214.33 to Feb. 28th. There are 803 associations under the bill and the number of cattle bought to Dec. 31st 1921 totalled 27,811. A total of 952 have died. The line of credit extended by the Merchants bank totalled \$1,525,000. Under the bill there had been loaned for feed \$21,836.43, and repaid \$2,676.84. There have been applications for feed totalling \$2500 this year.

**War On The Grasshoppers**  
Organization is now practically completed by the agricultural department for the most aggressive war ever carried on against the grasshopper pest. Z. McInnis, assistant deputy minister, will be in charge of the organization. Thirty districts have been organized.

These thirty districts include approximately 300 municipal districts and unorganized units. An agent of the department will be placed in charge of each of the 30 districts. These agents will have complete charge of the organization in each district, and also the administration of the new Pest act, in seeing that every one takes the necessary steps towards the destruction of the pest. The municipalities will install their own poison bait mixing machines, and the department will co-operate with them in every way possible. In the unorganized territories the agents will install the mixing machines in the most convenient locations. Supplies for poison bait will be furnished from the centres at Calgary, Lethbridge, Munson and Edmonton. It is the intention also to hold as many meetings of farmers as possible to impress upon them the importance of grasshopper control.

**The Roadside Grasshoppers**  
E. H. Strickland, professor of entomology in the Alberta University, who is in charge of the technical end of the campaign for the department, has been receiving numerous reports of the finding of grasshoppers and he has received some samples of these. He states that there should be no alarm about these however, since they are not the dreaded roadside grasshopper. Many of the samples sent in are in the young stages of the larger Carolina grasshopper that has black wings with yellow borders and which is frequently found in considerable numbers flying over roads during the late summer. While these grasshoppers are general feeders they have never been found particularly destructive to crops in Alberta.

By far the larger number of samples has been found it should be watched carefully from about the middle of species which is, at first glance similar to the dreaded roadside grasshopper. These are young stages of a grasshopper that has no common name. Fortunately these prefer to eat their fence rows, his pastures, old feed on sage and other weeds in preference to grain crops and they are never found in numbers in cultivated fields. Many people have expressed surprise that recent snow storms have not killed these grasshoppers, but their eggs were hatched out in the fall and they have hidden during the winter in old grass and other rubbish. The roadside grasshopper cannot survive zero weather, though it is not affected by snow or a few degrees of frost; since it does not hatch until about the 15th of May, at the earliest it is not likely to be so much affected by cold weather than it can stand. The eggs can be readily found scattered over two or three acres, now and farmers are urged to examine their fence rows and pastures much better and double the amount of for eggs. When a breeding ground labor in applying it.

**Blairmore Wholesale Jobbers**  
Clark Sartoris, Proprietor  
Wholesale TOBACCO, SOFT DRINKS, CANDIES and STATIONERY.  
**STRAIGHT CASH ON DELIVERY**  
We are obliged, owing to our recent loss by fire to demand CASH ON DELIVERY, but can guarantee you far better prices and service.

**Land For Sale**  
Near Lundbreck  
THE FOLLOWING LAND IS OFFERED  
FOR SALE AT A REASONABLE PRICE:  
WEST HALF OF SECTION 30 IN TOWNSHIP 9, RANGE 2, WEST OF THE 5TH MERIDIAN, SOUTH OF KEY RANCH.

Apply to  
**A. WARDMAN**  
4219 Sophia Street, South Vancouver, B. C.

**Bargain-Hunters**  
In this community are hundreds of individuals and families on the watch for an advertisement which will offer them what they want at an advantageous price.  
Call them bargain-hunters if you will, but there is nothing wrong in waiting for a bargain, especially when the retailer is anxious to sell at a reduced price.  
One family wants a new carpet—the need is not urgent. Another family is looking forward to buying dining-room furniture—it may not be for twelve months.  
One man is thinking of buying himself a watch. One woman a shopping bag; another an umbrella.  
All can be made to buy earlier—by advertising.

**A NOTE TO MERCHANTS**  
Stimulate business by the offer of some slow-moving lines at a special price. Brighten up business by advertising some desirable goods at reduced prices. Make advertising banish dull business. Often you can tempt the buyer who is hiding his or her time, to buy from you—at a time of your naming.

**Shop Where You are Invited to Shop**

Blairmore Lodge, No. 64, meets every Tuesday night at 8 p.m., in the Oddfellows' hall. Officers for the ensuing term: J. Patterson, N.G.; W. T. Patterson, V.G.; M. B. Hoffman, R.S.; J. B. Harmer, F.S.; J. Montalenti, Treasurer.

Crows' Nest Encampment No. 8, meets on the second and fourth Wednesdays of the month in the L.O.O.F. hall at 8 p.m. Officers for ensuing term: J. Patterson, C.P.; W. T. Patterson, S.W.; A. Morency, J.W.; Wm. Patterson, Scribe; J. Montalenti, Treasurer.

Crawfish Rebekah Lodge, No. 65, meets the first and third Thursdays of the month at 8 p.m. Officers: Sister Patterson, N.G.; Sister Fraser, V.G.; Sister Evans, R.S.; Sister Walker, F.S.; Sister Pinkney, Treas.

Bellevue Lodge No. 118, meets every Monday night at 8 p.m. Officers: F. Padgett, N.G.; H. Jepson, V.G.; H. Barless, R.S.; J. Wyatt, Treas. Amalgamated Encampment No. 17, meets the first and third Wednesdays of the month. Officers: A. B. Carr, C.P.; Stephen Berry, V.G.; Harry Jepson, S.W.; Fred Padgett, J.W.; E. Foxon, Treasurer; Charles W. Ray, Scribe, Box 6.

Ray of Hope Rebekah Lodge No. 67, meets the first and third Wednesdays of the month. Officers: Sister Christie, N.G.; Sister Barless, V.G.; Sister F. Hallworth, R.S.; Sister Litherland, F.S.; Sister Goodwin, Treas.

Visitors of the Order are cordially invited to attend the above lodges.

## Items of Local and General Interest

Miss Chrissy McLehman, who has been very ill for a few weeks, is fast recovering.

Fellows who spent Good Friday in the cage were simply compelled to be good on that day.

L. Duff and family and M. Belecky and family moved to Pincher Creek this week.

Canada has coal enough for 35 years, but seldom enough for one year.—Toronto Globe.

Mr. S. J. Lamey, who had been in a critical condition with pneumonia the past couple of weeks, is now doing well.

A gold pin, picked up on Monday last, may be had at this office upon identification and payment for this no fee.

A paper claims that usually dark haired women marry first. We should say that it was the light-headed ones.

The Columbia Record says: "We are not in favor of putting the coalminers and operators together. Our coal bills are high enough now."

J. Peck McSwain, writing in the Montreal Star, says: "There's too much latitude in woman's dress, and not enough longitude."

Miss Jessie Sheard has sufficiently recovered from her recent surgical operation to be able to return from Lethbridge this week to her home in Pincher Creek.

"Willie," said the infant's mother, agitated by the sudden appearance of a rich relative, "kiss your Uncle John and then go and wash your face at once!"

The lawless element that goes in for banditry in preference to bootlegging, has the advantage over the latter in that it is not bothered so much by the police.

Last week's casualty list at Fernie included the names of James Amadio, of Blairmore, and Miss M. C. Caravatta, of Michel. They received a marriage license.

In Detroit every third family has an automobile, giving that city the honor of having the highest ratio of riders to walkers of any city in the country, and no doubt the world. Detroit has 175,000 motor cars.

Last year the national printing plant at Washington used thirty-five square miles of paper. Had all the sheets been bound into volumes and piled one on the other, the top volume would be five hundred miles in the air.

The Toronto Globe remarks that it will be joyful news to British residents in Egypt to know that hereafter the Egyptians will be free to take an occasional pot shot at one another, instead of as heretofore confining their attention strictly to Britons.

In nautical language, an old sea captain was reproving his daughter for being out late in an automobile with her "lubber." "Put, father, we were becalmed," she explained. "You see, the wind died down in one of the tides and we had to wait until it sprang up again."

In the States, postal savings accounts are now protected by a finger print identification system. When you open an account you must make a finger print impression and these finger prints are checked up with impressions that must be made whenever you draw principal or interest.

Duncan Marshall, commissioner of agriculture, was sent to Florida to look into some livestock matters. Probably giving the heifers on the beach the once over.—Bassano Mail.

If a girl kisses you, don't kiss her back. What's her face for?

King George has conferred an earldom upon Sir Arthur James Balfour.

Mrs. W. E. Shields, of the Coleman teaching staff, spent Easter with friends at High River.

J. D. S. Barrett, proprietor of The Coleman Journal, paid a business visit to Calgary last week end.

At the forthcoming election in Manitoba, every seat is to be contested by the United Farmers of Manitoba.

Coleman golfers have reorganized for the 1922 season and will be shooting golf on a new course as the season opens.

A. L. Jensen, manager of the Bank of Commerce, Nanaimo, died after a two weeks' illness with grippe, followed by pneumonia.

His Excellency the Governor-General, Baron Byng of Vinhoe, has notified George Black, M. P. for the Yukon, that he intends to visit that territory this summer.

If a recent measure passed by the United States Senate becomes a law, alien convicted in federal or state court on charge of having violated the narcotic or prohibition act, will be deported.

At the Easter morning service at St. Anne's Catholic church, special prayers were offered for the recovery of Mr. S. J. Lamey, who was lying in such a critical condition at his home at Blairmore.

Misses Fulton, Douglas, Keith, Pickney, McLaren, Davis and MacGulley, of the local teaching staff, attended the teachers' convention at Calgary this week.

As a result, only the high school has been operating since Monday.

That children are allowed to attend school in Hamilton painted and powdered, without correction from the teachers, is the charge made by Mrs. Ross, police court representative for the Big Sisters Movement.

Pope Pius received in audience a delegation of Roman nobility, led by Prince Colonna. During the audience, the Pope delivered an address, urging the women of the Roman aristocracy to lead a crusade against the immorality of present day fashions.

A verdict of acquittal has been returned by a San Francisco jury in the third trial of Roscoe (Ratty) Arbuckle, on a manslaughter charge growing out of the death of Miss Virginia Rappe, motion picture actress. The jury was out six minutes.

There are so many motor cars in use in New York's theatre, hotel and shopping district that finding parking space for them is a problem for the men responsible for keeping traffic moving in the big town. A suggestion that is receiving consideration is that tunnels to accommodate 34,000 cars be constructed under two of the city's parks.

A gentleman writing to the paper says that "if people would think a little more and talk a little less, work a little more and kick a little less, it might be possible for them to feel that this is the best of all possible worlds." Well, perhaps the gentleman is right. But he is not practical.

Human beings enjoy kicking. They feel better after enjoying a spell of kicking. Feeling better, they work better. Kicking is an inalienable right to every free citizen. Let 'em kick, brother! But we do wish there was a little more downright thinking, inside the skull.

WASHING taken n—Apply to The Enterprise.

FOR SALE—A One-Ton Light Dray. Apply to E. J. Sargent, Box 33, Blairmore.

Babies are born in New York with long arms now—so they can reach their mama's skirts.

Germany has been barred from any further connection with the G-n-o-m economic conference.

John Drevoak, of Lundbreck, has been sentenced to six months hard labor for theft.

Mrs. L. I. Morgan spent Easter with her parents, Mr. and Mrs. H. Marquis, at Pincher Creek.

"Stop! Look! Listen!" When you see a pretty girl you stop and look, and when you marry her you listen.

The Alberta government's agricultural schools at Gleichen and Youngstown have been closed temporarily.

Wouldn't it be a grand thing if all the grouches and discontented people were as bad off as they think they are?

Lacombe Methodist and Presbyterian congregations have united and services are being held in the Presbyterian church.

The local lodge of the I. O. O. F. will observe the Anniversary of Oddfellowship by holding divine service on Sunday, April 30th.

The Nova Scotia Tramway & Power Company will claim \$50,000 damages if the rule of the road is changed from left to right.

The premises of Wo Koo, laundry, at the rear of the opera house, were searched by the A. P. P. yesterday afternoon for contraband.

The benefit dance given at Frank on Monday night was very largely attended. Splendid music was furnished by the Blairmore band.

It is estimated that there were fifty million tons of bituminous coal on the surface on April the first, and about ten million tons of anthracite.

Three children were burned to death and Mrs. Harrington is dying as a result of a fire which destroyed her home near Truro, Nova Scotia, last week.

It is locally believed that the letter recently appearing in the Lethbridge Herald, purported to have been written by a man named Smith in Calgary, went to The Herald from The Pass district.

A chance to make your fortune: The Nova Scotia government offers a bounty of ten cents each for porcupine pelts produced to show that they have been killed this year. It takes about three days to locate a porcupine and less than a day to skin one.

Mayor Hardie, of Lethbridge, and Mayor Bessanberry, of Pincher Creek, have both expressed surprise that the Lethbridge Board of Trade had ever considered any other action than to fight the removal of the day trains which do so much to link up Lethbridge with the towns along this line.

At Coleman on Saturday last, Donald Lewis, proprietor of the Summit Hotel at Crows' Nest, was fined \$500 for having liquor in his possession in other than a private dwelling. In the same court Pat Shopak, of Bellevue, dug a \$350 for taking similar liberties.

As will be noticed by an advertisement elsewhere in this issue a general change in train time takes effect on April 30th, whereby the locals will leave Blairmore at 10:05 a.m. and 4:25 p.m., and the morning west bound at 8:20 and evening east bound at 10:45.

## Canada's Pressing Need Is For Establishment Of Sound Immigration Policy

The immigration policy of Canada for the future is in the making. It is among the first two or three questions now before the people of this country, and no one is better fitted to advise concerning it than is Col. J. S. Dennis, of Montreal. Col. Dennis has spent fifty years dealing more or less directly with this problem. In the service of the Dominion Government in Western Canada and later with the Land Department of the Hudson's Bay Company and for the past 21 years with the C.P.R. Department of Colonization and Development, of which he is now Chief Commissioner, his activities have been largely directed towards filling Canada's vacant places with desirable settlers, producers of wealth such as are today more than ever needed to re-establish the prosperity of the Canadian people.

COL. J. S. DENNIS

In voting the need of an aggressive and progressive colonization and development policy, Col. Dennis points out that it is the foundation upon which the superstructure of the solution of Canada's railway, industrial and unemployment problems must be erected, and he continues:

"In Canada today we have 1 mile of railway for every 236.5 of our population, and in the four western provinces, 1 mile for every 110. Compared with this, the United States has 1 mile of railway for every 404 persons, and Great Britain one mile for every 1.804.

"In the three provinces of Manitoba, Saskatchewan and Alberta, are 29 million acres of land suitable for immediate cultivation, and non-productive, within 15 miles of each side of the railways now in operation.

"In the older provinces of Canada we have many thousands of improved farms, neglected and non-productive and waiting for colonists.

"The national debt of Canada today is \$2,372,000,000, or about \$275 per capita of the population, and the annual interest on this debt amounts to \$11,000,000 as compared with a total Federal revenue in 1912 of \$188,000,000.

"The census of 1911 showed that we then had a population of 1,206,642. The last census shows a population of 2,934,841, a growth that is even less than normal. What are we going to do about it? My answer is—'colonize and develop.'"

"When I say 'colonize,' I use the terms in the broad sense of the immigration to Canada of the colon who will occupy and make productive, available agricultural areas, and also laborers, skilled and unskilled, who will develop our mineral and timbered areas and extend our industrial life, and finally the colon of the necessary capital to make both of the preceding activities possible.

"During the war, and, practically, up to date, both our colonization and development have been standing still. We are now faced with the question of how we can again stimulate a large movement of desirable colonists to Canada and where they can be obtained.

"Naturally, as part of the British Empire, we should first look to obtaining the greatest possible number from Great Britain and Ireland.

"The present population of the United Kingdom is 47,000,000, but of this number, less than 1,000,000 are engaged in agriculture, and unless we are prepared to take a large number of colonists without any previous knowledge of agriculture we cannot look for the immigration of large numbers from Britain. Further, it would now seem to be perfectly clear that the United Kingdom, and particularly England, must look forward to the emigration of many millions of its people, and our policy should be aimed at co-operative action between our Government and that of the Home Country to evolve some scheme whereby many of these people of the younger generation can be fitted for agricultural life in Canada by some preliminary training at home, and finishing the training here, together with final assistance, to enable them to establish themselves as farmers after this training has been obtained.

"We must, naturally, look for a large proportion of our agricultural colonists from the United States. We should also look forward to the immigration of large numbers of desirable colonists from Central Europe. While it should be our aim to maintain and extend British ideals and our Canadian citizenship, we must not forget that many who have come from so-called foreign countries are today amongst our most progressive and valued citizens, and who have been, and are taking an active part to solve our national problems and are proving

ing their willingness and desire to become good Canadians, as is proved by the fact that in one of our Western Universities, over 50 per cent of the students are of so-called foreign parentage, and that, during the war, many of our military units contained upon their rolls the names of many so-called foreigners.

"In considering the question of development, I would direct your attention to the fact that Nature has blessed us in Canada with resources of agricultural land, timber, minerals and other things which, potentially, are ample security for our vast national debt, but the possibility of taking care of and discharging that debt is entirely dependent upon our development policy. These resources, undeveloped, are of no value, and, without men and women, cannot be developed.

"In conclusion I desire to affirm that the problems I am outlining are non-political, and that a policy for their solution must be developed on broad lines and with the assistance of all interests and must include, more or less, an open door, and the establishment of a well-considered, thoroughly justified and extended world-wide organization, to make our principles known and to ensure that we shall, through the medium of colonization and development begin now, and carry on for many years, an aggressive and progressive policy for colonization and development, through the medium of men and money, of the natural resources with which Nature has so bountifully blessed Canada."

### Generations of Herders

Reason British Livestock has Reached High Standard

A note in a Scottish paper reports that the old herdsman of the famous Shorthorn breeder, Angus Cruickshank (whose name will always be associated with Shorthorn history) is still living, and that his sons are herdsman, one at Windsor and another at Cilmadoc, in charge of the Royal and the Prince of Wales herds. No wonder British livestock has reached the highest standard of the world when the labor employed in caring for it is handed on from father to son from one generation to the other and the years of experience and training gained thereby preserved.

### Take Up Homesteads

In Kenora District

Many Prairie Farmers Said to be Attracted to Clay Belt Near Dryden

Many western farmers are taking up homesteads in the "Clay Belt" near Dryden, in the Kenora district, according to Agricultural Representative M. F. Cook, who claims that the absence of crop failures in this neighborhood is proving an attraction to the prairie farmers. There is still much Government land to be taken up around Kenora, he reports, although the weather of the past year was none too favorable, sufficient feed was produced to carry over all stock. Grain, potatoes and clover, particularly the latter product, do well in the "Clay Belt" section.

### Government Gets Coal Royalties

The federal treasury was enriched by \$1,833,071.71 in coal royalties from Dominion lands from April 1, 1906 to March 31, 1921. During the same period, coal royalties from school lands in Saskatchewan and Alberta totalled \$183,819.66. This information was tabled in the House of Commons.

Caniballistic beetles are being imported from Japan to destroy certain leaf-eating beetles of the eastern states.

### Community Grazing

Many Advantages Claimed for this Form of Grazing

The organization of four community grazing associations in Saskatchewan is announced. Such associations have worked out very successfully in a number of the United States where conditions are not greatly unlike those existing in this province. Among the problems to which the Saskatchewan Better Farming Commission applied itself, community grazing had a prominent place. On the advantages of this form of grazing the commission said:

"Community grazing areas present a number of advantages: (1) A large area can be fenced at a smaller cost per square mile than a small area. Fencing required for six single sections would fence a whole township. (2) The range could be subdivided so that the various classes of cattle could be kept separate, the breeding stock in one pasture, the yearling heifers in another and the steers in another. (3) Bulls of good quality could be divided and used to better advantage than in small herds. Herd improvement under such conditions would be facilitated and an opportunity afforded of following a consistent policy of breeding, the advantages of which are not sufficiently realized. (4) Range management could be carried on better under the community system than under the individual ownership system, as the joint management would likely be more effectively than the average of individual farm management. (5) Range and herd supervision could be conducted with a minimum of expense to the individual stockowner. (6) The marketing of animals on the grass could be done easily under this system. When ready for market, uniform carcasses of cattle could be made up, and all stock being branded, the animals could be identified easily and the proceeds distributed."

—Regina Leader.

### Mexico Exhibits for Canada

Mexico, it is reported, will have a large display of its products at the Canadian National Exhibition in Toronto this year, and the prospects are that President Obregon and a number of members of the cabinet will be there for several days, together with the president's band, an organization of over 100 pieces.

### In Bad Company

The largest cities of Massachusetts show the largest percentage of Hitlerism of the big cities of the United States. If Boston has anything to say on the subject, it is time for her to speak up.—Cleveland Plain Dealer.

### Awful Silence of the Antarctic

The Most Desolate Portion of the Earth's Surface

Captain R. R. Evans, who was second in command of Scott's Antarctic expedition, in his book, "South with Scott," gives many pictures of the dreadful grimness of Antarctic scenery and of the awful silence. He says:

"How sinister and relentless the western mountains looked, how cold and uninviting the foothills, and how grey the sullen icebergs that girded this sad, frozen land. . . . The silence in its bleak loneliness is probably the most desolate portion of the earth's surface, with the possible exception of the high plateau which forms the ice cap of the great Antarctic mountain ranges."

Everything there was weird: "We were marching, as it were, under the shadow of Erebus, the great Antarctic volcano, and on this never-to-be-forgotten night the Southern Lights (a form of Aurora) played for hours. If for nothing else, it was worth making such a sledge journey to witness the display. First vertical shafts ascended in a fan of electric flame, and then the shafts all merged into a filmy, pale chrome sheet. This faded, and intensified alternately, and then in an instant disappeared. The awful splendor of this majestic vision gave us all a most eerie feeling."

The loneliness and stillness were almost insupportable. The awful absence of life struck strong notes within us. Even our feet made no noise at all, clad in their soft fur boots. . . . The silence was ghastly, for beyond the sound of our own voices and the groaning of the sledge runners when the surface was bad there was no sound whatever to remind us of the outer world."

### Princess Mary's Hospital Training

Did the Princess bath my baby? Was a frequent question in a London hospital for sick children where Princess Mary trained, for two years, three days and the last one day a day during a portion of her training, with the resulting question from many mothers, each desirous that her baby should be so distinguished. On beginning her hospital training the princess went straight away, to her duties of bed-making, washing and feeding the babies in the medical ward, and so on, to the more advanced stages of medical treatment, including assisting at operations.

### Canadian Exports

The value of exports from Canada to the British Isles during the fiscal year, which closed March 31 this year, exceeds \$298,600,000.

## Lure Of The North Calls Explorer Leden Despite Previous Disasters

Arctic exploration will finance itself in the next expedition to the large islands west of Greenland and the 40,000 square miles of unknown territory north of Hudson's Bay, it is being organized by Christian Leden, who has made four trips into the north on two of which he met with disaster when his ship and supplies were lost. This time he intends to form a scientific colony which will be in constant communication with the outside world until his work is accomplished.

Mr. Leden has spent many years with the Eskimos, studying their language, music, religion and traditions. He has done work for the University of Christiania and for the Canadian Government, and in the museum at Ottawa is a splendid collection he made showing Eskimo culture and habits of living. His expedition will probably leave in June, either from New York or some European port. He will take with him geologists to estimate the vast stores of minerals about which the natives have told him, and to see if there is in them anything of value which might be exported; botanists to study the plant life of the northern summer, and archaeologists to dig among the strange stone ruins which have been found by his fellow countrymen, Captain Stenroos, evidently built by white men in a place where white men have never been known to penetrate. He has mapped-out for himself a fascinating trip that will, he hopes, do much to reveal the secrets of this northern land where white men have entered and disappeared leaving behind them evidences of their mixed ancestry.

The expedition will be untrammeled by the requirements of any scientific institution, for Mr. Leden expects to secure sufficient capital without appealing to the usual sources for help, and after he gets there he is to try the unusual experiment of maintaining his base by exporting things of sufficient value to pay for the constant trips of his supporting ship between the north and civilization. Stefansson thought it could be done by maintaining reindeer farms. Mr. Leden is going to try it, using his own and other products of the country.

"People have a misconception about the Arctic," says Mr. Leden. "It is beautiful. Even in the winter it is lovely, and its fascination always draws explorers back to it. And in the summer it is a paradise. The summer starts only from the middle of July to the middle of August, but in those weeks it never freezes. The air is full of birds, trees are in full leaf, flowers bloom, insects sting everywhere and the flowers are more fragrant and the grass is greener than anywhere else in the world. The Arctic, pays in its short summer for all the desolation of the winter. But even in winter there is a sense of freedom from the ties of civilization, freedom from worry, that holds you. There are no landlords, no coal bills, no 'don't do this, don't do that.'"

Mr. Leden's former work has been mostly in anthropology and ethnology. From 1913 to 1916 he spent northwest of Hudson Bay, living in an Eskimo village. The invasions of civilization began as he can be fought, because of its value to science, for already he has established by a study of their music that the Eskimo and the aboriginal races of the Americas are from the same root race.

### Protecting the Potato Crop

Steps that Should be Taken in the Early Stages of Growth

"The leaves of the potato vine must be kept intact and in a thrifty condition if a maximum crop is to be obtained, and both insects and diseases should be kept from attacking the crop."

When the leaves are attacked by insects, and the vines are damaged, the crop will be reduced. The most common insect which attacks the potato is the Colorado beetle. This insect is a pest of the potato, and it is very difficult to get rid of. The best way to get rid of it is to use a good insecticide. The most common insecticide used for potatoes is Paris green. Paris green is a very effective insecticide, and it is very easy to use. It is applied to the leaves of the potato, and it kills the insects. Paris green is also a good fertilizer, and it is very easy to use. It is applied to the soil, and it fertilizes the soil. Paris green is a very good product, and it is very easy to use. It is applied to the leaves of the potato, and it kills the insects. Paris green is also a good fertilizer, and it is very easy to use. It is applied to the soil, and it fertilizes the soil. Paris green is a very good product, and it is very easy to use. It is applied to the leaves of the potato, and it kills the insects. Paris green is also a good fertilizer, and it is very easy to use. It is applied to the soil, and it fertilizes the soil. Paris green is a very good product, and it is very easy to use. It is applied to the leaves of the potato, and it kills the insects. It is applied

## TEN PER CENT MONTHLY.

When George Jones, out in California borrowed \$100 for three months at ten per cent monthly, to be compounded monthly, he probably had no intention of becoming the world's greatest debtor. But he failed to pay the debt, and now after the elapse of a quarter of a century, a California judge finds, with the aid of two expert accountants, that Mr. Jones owes to Henry R. Stuart, of whom he borrowed the money, the sum of \$304,840,332,912,655.16. It would appear that under the California law, the claim of Mr. Stuart for his hundred dollars and accrued interest duly compounded is good, if he can collect it, the money is his.

Could the world's greatest debtor discharge his obligations, his creditor would not only own the earth, but he would be the proprietor of much of the rest of the universe.

## JEOPARDIZING TRAFFIC

Much has been said by the public against the action of the police on Saturday night in making use of a gun in an effort to intercept a car believed to be enroute into Alberta from Crow's Nest with a quantity of liquor.

The police claim they were justified in their action and that a driver should stop when ordered by them; but the driver claims his brakes were not working well and that, despite his best efforts, before his car could be halted it had been riddled with bullets. That the shots were indiscriminate is evidenced from the mud guards of the car, showing that the bullets may have glanced in any direction and perhaps killed an innocent occupant.

The car and also one preceding it simply contained pleasuring parties. They were searched and not the slightest evidence of liquor was obtained.

We understand that an investigation into the affair will be demanded. At any rate, if in the enforcement of the liquor act the lives of a law-abiding public are to be jeopardized by gun shots from peace officers, some other method should be adopted.

Even though you keep on discharging your duties, you never get rid of them.

## COWLEY HAPPENINGS

R. N. Moir spent Sunday at Nanaimo.

Miss Margaret Kemmis is the guest of Mrs. George Porter.

Miss Edith Baines, of Lethbridge, is here for a short visit.

R. H. Garrison, of Claresholm, paid a visit to the North Fork on Friday.

Miss Blackburn spent Thursday in town and went to Plahburn for the Easter holiday.

Felix Guigue has returned to his farm, after spending the winter in The Pass.

Miss Gladys Baines spent the Easter holiday with her parents in Lethbridge.

Clare Snyder, of the Union Bank staff, Blairmore, spent the week end here at home.

Miss Horton, of Heath Creek, left Tuesday for Calgary to attend the teachers' convention.

It is reported that the Harrison store in Cowley has changed hands, or a deal pending, the purchaser being Ernest McEwen.

Quite a number of the Cowley jazz fans attended the novelty dance at Pincher Creek on Monday night and report having had a fair time.

J. H. Holmes, fishery overseer, is again in the district. He expects to make his headquarters at Pincher Creek for part of the season at least.

Rev. Dr. Unsworth concluded his evangelistic services with a large meeting on Thursday night. With his pleasing personality, he made many friends here.

The Misses Anderson and McWilliams, of the public school staff, are attending the Calgary teacher's convention. The school is closed until next Monday, an especially long holiday.

Undertaker Ferguson has just completed a large garage at the rear of his residence.

Robert Small used is able to be around with the use of a stick and hopes to resume his duties at the auto repair shop in a few days.

## HILLAREST HAPPENINGS

(By Our Own Dear Felix.)

J. Gorton, senior, left Monday on a visit to the coast.

Bill Prescott is the latest addition to the Car Owners Association, with a new Dodge.

Several of the teachers are attending the convention at Calgary, including Misses Thompson, Jeffries and Sellen.

The Method at church has been re-floored and varnished inside. The next thing is painting the exterior. Being so close to the beautiful new school, the church looks sadly in need of decoration.

The dance given by the Junior Baseball Club in the Union hall on Monday night was a huge success in every way. A crowded house and good music and a good time is reported, and a substantial sum was realized for the club.

It is with regret that we have to announce that our most esteemed and respected citizen, John Gikas, (more familiarly known as "John the Greek") is out on \$2000 bail in connection with the shooting affray in the early hours of Sunday, the 6th instant. As a testimonial to his excellent marksmanship, besides hitting the other fellow in the elbow, the floor shows four good bullet holes. As a result of the affair, a movement is on foot to send John to the next Bixley meeting, but it is to be hoped he does not stay there permanently, as Hillarest can ill afford to lose such a respected resident. (???)

A splendid entertainment was given in the Methodist church here on Monday night by the Sunday school class of Miss May Price. The girls looked very pretty, all dressed in white. Dr. McDonald presided. Choruses, dialogues and singing formed most of the programme. Miss Jennie Stubbs excelled herself in singing the song, "Won't You Buy My Pretty Flowers," accompanied by Miss Nellie Royle. After the concert a splendid repast was served. Owing to some mistake, the attendance was not as large as it might have been, but it is to be hoped that in the very near future this concert will be repeated.

## COLEMAN HAPPENINGS

Mr. George Kellock made a business trip to Calgary last week.

Mr. George Powell paid a visit to old friends in Taber last week.

Mrs. O. E. S. Whiteside and daughter Della spent the Easter holidays in Calgary.

Miss Rose Dunlop has gone to Drumheller, where she will remain for some time.

Miss Rose Murray, of Lethbridge, is spending Easter week with her sister, Miss M. E. Murray.

The show and adverse weather over the holiday has somewhat damped the ardour of the early golfer, but we hope for better weather soon.

Easter services were observed in the Anglican church here on Monday, April 17th, owing to the difficulty in being able to have a minister for Easter Sunday.

Mr. Jack Graham has accepted a position in Lethbridge post office and has left town to fulfill his duties there. Mr. F. Graham, jr., will take charge of the post office here.

Mr. R. G. Powell, Mr. C. Nimmons, of the high school staff, and Mrs. T. P. Shields, Miss C. McEldrich and Miss Louise Price, of the public school staff, are attending the convention of teachers in Calgary this week.

E. J. Pozzi has secured the contract to erect a large two-story office building for the West Canadian Collieries at Bellevue, and an electric sub-station at Blairmore, work on the latter having already commenced.

## WE ARE ALL SIAMESE TWINS

Josefa and Rosa Blazek, "Siamese Twins," joined together at the hips from birth, are dead. One died naturally of jaundice and pneumonia. The moment her heart stopped, the heart of her sister, who had been convalescent, stopped too.

One couldn't live without the other. The sooner everybody realizes that we are all Siamese Twins--nations and individuals--the better.

The United States thinks she can get along without Europe, that she can prosper, live and progress entirely isolated from the Old World. The truth is that the Old World and the New are as tightly joined together as Rosa and Josefa Blazek. When one suffers, the other must suffer, industrially, socially and politically too.

Labor and capital regard themselves as separate entities, each with its own ideals and purposes. Labor fights capital and capital fights labor--and the consuming public composed of both parties gets squeezed in between.

Labor, capital and the consuming public are nothing but Siamese twins, each dependent on the other, each drawing on the other for life force. Any one of the three without the others would atrophy and decay.

Some people in Canada think that the West is divided from the East in interests. They think that to encourage the West, develop Western natural resources, give the West what she wants in the way of transportation facilities and money would impoverish the East.

The West thinks the East is selfish, that Western business can stride ahead without regard for Eastern interests at all.

Yet Eastern and Western Canada, in reality, are the tightest, closest, most interdependent Siamese twins in the world.

Every individual depends utterly on every other individual. The present generation takes up its thinking at the place where the last generation left off.

left off.

Past and present, religion and science, man and woman, rich man and poor man, master and slave, spirit and matter are all Siamese twins, one and inseparable.

Too much industrial and social surgery is largely what is wrong with the world--Vancouver Sun.

## SWIM UP STREAM

It's easy to drift as the current flows; It's easy to move as the deep tide goes;

But the answer comes when the breakers crash  
And strike the soul with a bitter lash;  
When the goal ahead is endless fight  
Through a sunless day and a starless night.

Where the far call breaks on the sleeper's dream,  
"Only the game fish swims up stream."

The spirit waits when it knows no load;  
The soul turns soft down the Easy Road;

There's fun enough in the thrill and throbs,  
But life in the main is an uphill job;  
And it's better so; where the softer game

Leaves too much fat on a weakened frame,  
Where the far call breaks on the sleeper's dream,

"Only the game fish swims up stream."

When the clouds bank in, and the soul turns blue,  
When Fate holds fast and you can't break through,

When trouble sweeps like a tidal wave,  
And Hope is a ghost by an open grave,

You have reached the test in a frame of mind  
Where only the quitters fall behind,  
Where the far call breaks on the

enraptured dream,  
"Only the game fish swims up stream."

## CANTATA A REAL TREAT

The cantata rendered by the Bellevue church choir at the Union church last night was a treat and very much enjoyed by the large audience that attended.

The cantata was entitled "The Saviour of Men," and was rendered by a choir of twenty-one voices, accompanied by Miss Margaret Williams at the piano and conducted by Mr. Watts Goodwin.

At the close, a vote of thanks, moved by Rev. W. T. Young and seconded by Mr. L. H. Putnam, was heartily endorsed.

## GENERAL CHANGE

in  
TRAIN SERVICE

effective

SUNDAY, APRIL 30, '22

Time for trains at BLAIRMORE:

DAILY

Eastbound No. 68--10:45 p.m.

## Changed Attitude Of France Towards Russia Is Noted At Genoa

Genoa.—Delegates from several countries represented at the economic conference remark, informally upon what seems to them a changed attitude on the part of France toward Russia. They declare that Louis Dardou, head of the French delegation appears to be especially cordial and conciliatory in his manner toward George Tchitcherine, leader of the Russian group in public meetings. They interpret this as indicating that France is now disposed to go as far as possible towards reaching an understanding with Russia.

Nikolai Lenin, Soviet premier, will come to Genoa to replace George Tchitcherine as head of the Russian delegation when the negotiations at the economic conference reach the proper stage says the newspaper Secolo. The newspaper adds that an apartment is being prepared for Premier Poincaré of France at the Villa Paglio, and he is expected here shortly.

The meeting of the commission on Russia has been postponed until tomorrow, M. Tchitcherine awaiting instructions from M. Lénine, at Moscow, with whom he is in direct communication.

London.—The reported intention of David Lloyd George, the British premier, to propose at Genoa a pact or understanding "that no nation shall attack another" is featured in two or three of the London newspapers.

"However plausibly the plan may be framed," says the Daily News, "it is bound to be more spectacular than real."

Mr. Lloyd George has declared that the conference, before it can usefully discuss disarmament, must create a peaceful atmosphere by settling the causes of disagreements which lead to war. "He might have

## Objection to Wheat Board

Montreal.—The establishment of a Government Wheat Board will kill the flour milling industry in Canada, declared General A. E. Labelle, president of the St. Lawrence Flour Milling Company, Limited, addressing the Chamber of Commerce here. He asked the chamber to adopt a resolution protesting against the Government meddling with wheat prices. The chamber approved of the resolution in principle and the secretary was directed to frame the official resolution which will be forwarded to the Government.

added that an efficient instrument already was available both to remove disagreements and to organize disarmament.

Establishes Claim to Pension  
Moncton, N.B.—Mrs. Rachael McQuinn, of this city, has recently come into possession of a windfall from the United States Government. A pension to which she was entitled in consequence of her husband having been in the American Civil War, has been accumulating for thirty years, and she succeeded in establishing her claim to it.

Children's Library in Toronto  
Toronto.—This city is to have the first public library in Canada devoted exclusively to the use of children. A building on George Street, near the College Street public library, has been purchased for the purpose. The children's library will have a reference department for the use of school children.

## Britain Again Leads In Ship Construction

Orders in Hand Total Over Two Million Tons

New York.—With world shipbuilding rapidly reverting to the pre-war scale, Great Britain has resumed her great lead over the other countries of the world in the construction of ships of all classes. At the same time the United States, despite the great agitation for increasing maritime power, has fallen behind.

This is disclosed by a statement issued here by Lloyd's. It shows that the shipyards of the United Kingdom have orders in hand totalling over 500,000 gross tons more than before the war. The United States yards have orders in hand for only 138,000 tons, a decrease of about 10 per cent. from the figures for July, 1914. All other countries than the United States and Great Britain with the exception of Germany, for which no authentic figures are available, now have under order more than double the pre-war construction aggregate for these nations. The figures showing the amount of shipbuilding order now in hand give a clear indication of the lead held by Britain. They are: United States, 138,266 tons; United Kingdom, 2,235,998 tons; all other countries, 1,307,358 tons.

The British Dominion, according to Lloyd's figures now has 43,650 tons under construction, against 65,469 tons on January 1, 1922.

## Lord Curzon's Note Pleases United States

Britain Recognizes Reimbursement Claim for Army in Germany

Washington.—Secretary Hughes received from Ambassador Harvey in London, a note from Lord Curzon, Foreign Secretary, which stated that the Government of Great Britain would not in any circumstances desire to question the rights of the United States in its claims for payment of costs of the American army of occupation in Germany. Secretary Hughes later transmitted a note to Ambassador Harvey for delivery to the British Foreign Office, expressing his gratification over Lord Curzon's letter and expressing hope that reimbursement for costs of the United States' army in the Rhineland would soon be made.

Arbuckle Acquitted  
San Francisco.—A verdict of acquittal was returned by a jury in the trial of Roscoe Arbuckle on a manslaughter charge growing out of the death of Miss Virginia Happe, motion picture actress. The jury was out six minutes.

"The defendant was deeply affected. He received the verdict with a great sigh of relief. There was no demonstration, the court having warned against it. Mrs. Minta Durfee, Arbuckle, the defendant's wife, cried quietly. Both she and Arbuckle shook hands with the jurors. The verdict was by acclamation."

Canada's Navy Has Returned  
Halifax.—The Canadian naval squadron consisting of the light cruiser, Aurora, destroyers Patriot and Patricia, and submarines CH-14 and CH-15 have arrived in Halifax from West Indian waters.

Old Age Pension Plan  
Ottawa.—The advisability of the Canadian Government instituting a system of old age pensions will be debated in the House of Commons. Dr. J. E. LaFontaine (Liberal, Hull), introduced a resolution on the order paper.

## WESTERN EDITORS

W. J. Huntington, Editor of The Star, Walworth, Alberta.

Plenty of Moisture and Bumper Crop Yield Anticipated

Winnipeg.—With an early spring well on the way and plenty of moisture guaranteed for early months, a bumper crop was predicted for Manitoba. The plant will be ready some time in June. It is expected that this new departure will lead to the opening of many properties that otherwise would not have an incentive to open, besides assisting many now operating.

There has never been as much land plowed and ready for seed as there is this year," Mr. Malcolm said. The acreage in crops for immediate work is placed at 4,902,650 acres, as compared with 4,328,200 in 1921.

These figures do not include the spring plowing, which will be under way within the next fortnight. The total acreage sown to crop last year was 7,151,087.

The districts which have been infested with grasshoppers during the past three years are free of the pests this year as nearly as can be judged at this time, and Mr. Malcolm declared that he did not believe these pests would be a menace this year.

## Japan Welcomes Prince

Royal Visitor Heartily Greeted by Thousands in Yokohama

Yokohama.—The Prince of Wales has arrived for his official visit to Japan. Thousands gathered to welcome him landed from the British battle cruiser Renown which brought him from India.

His reception was carried out according to the programme to the minutest detail, as is the Japanese custom. Yokohama's welcome was not only as the children who lined the streets are disciplined to silence, but the picture they made with their thousands of waving flags in the brilliant sunshine could scarcely be paralleled. The Renown was escorted in from sea by the Japanese light cruiser division and in the bay six battleships, including the famous Mutsu, joined the escort. As the vessels entered the harbor there was a roar of guns and shrieking of sirens. Every class of society was represented in the crowds on the wharves.

The Prince left Yokohama for Tokyo on a special train, three coaches of which were especially built for his use.

Surplus on Canadian Lines  
Ottawa.—Operations on the Canadian lines of the Grand Trunk Railway saved the whole system from an operation deficit, according to detail statistics. On the Western lines the operation deficit was \$147,925.11; on the New England lines, \$681,490.29; and on the Central Vermont \$176,396.42. But, on the Canadian lines there was an operation surplus, namely: a surplus of operating revenue over operating expenses of \$5,678,739.47, making an operating surplus for the whole Grand Trunk system of \$4,732,517.

U.S. Settlers for Peace River  
Edmonton.—There is to be a large influx from Wyoming to the Peace River country this month, over twenty-five families leaving Sheridan, April 15, for Edmonton. Francis W. James, a prominent rancher, states that big tracts of land will be taken up for ranching purposes.

Famous Picture to be Leased  
London.—Hon. P. C. Eakin, Canadian high commissioner, has obtained from Sir Wm. Orpen, the famous English artist, the loan of Sir William's painting "Hall of Mirrors" for the Canadian national exhibition this year.

Use MURINE EYES  
Sun Wind Dust Cinders

## Anthracite Producers Believe That Miners May Modify Demands

### Famous Aviator Killed

London.—Sir Ross Smith, the Australian aviator, who with his brother, Sir Keith, had planned to start from Croydon on April 25 for an attempted flight around the world, was killed when his plane crashed in a practice flight at Brooklands. Lieut. Bennett, an engineer, who was planning to accompany Sir Ross and his brother on their around the world flight, also was killed. The machine which crashed was the one the Smiths intended to use in their flight. Capt. Conkerrill of the Vickers Company, had previously flown it for a half hour, then handed it over to Captain Smith. As the machine was approaching the airfield to land, it got into a spin and the fatal crash followed.

### Company Issues

### Zinc Schedule

Is Considered a Great Advance in Kootenay Mining

Nelson, B.C.—A zinc schedule, the first in the history of Canadian mining, has been issued by the Consolidated Mining and Smelting Company of Canada in connection with its smelter at Trail, and particularly in connection with a special plant now being built by the corporation to treat the custom zinc ores of the Slocan and other silver-lead-zinc sections on similar lines to treatment of its own enormous tonnage from the Sullivan mine. The plant will be ready some time in June. It is expected that this new departure will lead to the opening of many properties that otherwise would not have an incentive to open, besides assisting many now operating.

The smelter will pay from 60 to 85 per cent. of the zinc, for 80 per cent. of the gold and the silver in said zinc ore, and for 80 per cent. of the lead, less five cents. The gold, silver and lead recoveries will be in the smelting of the residues after the leaching out of the zinc, and the smelting charge will be less as the zinc tenor increases. This is the greatest advance in Kootenay mining since the conquest of the complex Sullivan ores by the Consolidated at a cost of \$3,000,000.

### Asiatic Settlers Not Desirable

H. H. Stevens Appeals for Policy of Restricted Immigration

Kington, Ont.—Speaking before the Canadian Club here, Hon. H. H. Stevens, M.P., Vancouver, made a strong appeal for a policy of restricted immigration.

"We want an increase in population," he said, "but we must shut the bars against all races and types that cannot be assimilated by us. By assimilation I mean marriage. We can take the white man who will go on the land, the farmer, the craftsman, the merchant, all of whom make ideal citizens, but we cannot admit people from Central and Southern Europe and Asia."

Mr. Stevens urged that Canada could not withstand a great immigration movement from China, Japan and India. The white race would eventually become swamped out if no effective laws were enforced against Oriental immigrants.

### Robbers Secured Haul

Vancouver.—After checking up with the victims of the recent robbery of safety deposit boxes in the Royal Bank Canada branch at Ladner, on March 29, the total value of the Victory Bonds and other securities taken has been estimated at \$124,450, according to a statement made by C. W. Frazer, supervisor of branches here. Of this amount only \$25,000 were bearer bonds, the balance being registered.

Law Degree for Gen. Pershing  
Montreal.—General John Pershing, chief of staff of the United States army, will receive the honorary degree of doctor of laws at McGill University on May 12, it was announced here by General Sir Arthur Currie, vice-chancellor, and principal of the university.

Dangerous Venture  
Panama.—Michael Hedges, a British explorer, planned to start at once on an exploration of the Panama Isthmus from Virgo to White man. The natives of this region have consistently opposed the entrance of whites, and his venture is looked upon as dangerous.

New York.—Anthracite producers notice a tendency on the part of the union leaders to soften their 39 demands when, before the miners and operators sub-committee on wage contract negotiations they asked permission to reconsider their demand number one.

This demand stipulates that the new contract agreed upon in settlement of the pending strike shall not tend for two years; prohibits the making of individual agreements and provides for the establishment of uniform wage rates for operators and mechanical loaders.

Operators reported they had balked at part three of the demand, asserting that a uniform rate was already in effect where mechanical loaders were in use. With their consent discussion of the demand was temporarily abandoned, to permit district presidents to consult their men before deciding whether it should continue an issue in the negotiations toward settlement of the strike.

Only three of the 19 provisions which the strikers have insisted their new contract must contain, have been taken up by operators. With none of these points settled and 16 more to be considered, both sides predicted that several weeks will lapse before a negotiation will be laid for a new contract and work begun in the anthracite regions.

## War on Border Smugglers

U.S. Will Fight Runners at Canadian Border With Machine Guns

Albany, N.Y.—Adjutant-General Kincaid has made public a telegram from Roy A. Haynes, Federal Prohibition Commissioner, in which Mr. Haynes was quoted as endorsing the Adjutant-General's plan to co-operate with Robt. A. Day, Federal Prohibition Director for the State, in an intensive campaign against run smugglers along the Canadian border. Employment of machine guns and armored motor cars to be furnished by the Adjutant-General, was contemplated in the campaign to stop the illicit traffic, according to the announcement of the plan in New York.

## War Memorial for Moose Jaw

Moose Jaw.—Residents of Moose Jaw, at a special meeting called by Mayor W. F. Dunn, decided upon the erection of a temporary war memorial in this city. A committee, composed of Mayor Dunn, Col. Norman Gies, Mrs. W. H. Greene, J. R. Greene, chairman of parks board, and three others to be chosen later, was nominated by the meeting to proceed immediately to draft details for erection of the memorial.

## No Duty on Gifts to War Areas

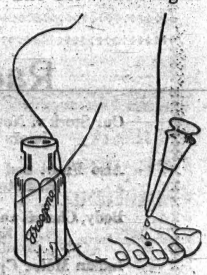

London.—A law was promulgated according to Reuters. Paris correspondents abolishing customs duties and other taxes on gifts to departments and communities in the devastated areas of France. The law is to be retrospective, and duties already levied on such gifts will be cancelled.

## Spanish Miners Strike

Madrid.—The miners in the province of Biscaya have gone on strike. Biscaya, the northwestern end of the Basque provinces, borders on the Bay of Biscay. It is rich in iron ore.

## Local and General Items

Seventy pounds of meteors land on this earth every minute.

Nova Scotia last year borrowed \$1,108,500 for the erection of homes under the new housing scheme.

We overheard a Chinaman the other day singing "It's a long lay to Tippielaly." It is from China alright.

Cutting off advertising may reduce expenses, but so does cutting your windpipe reduce the cost of living.

Glacier Bay miners are talking of One Big Union of the West and the more radical workmen have got that union well under way.

A Cowley husband, who recently broke his umbrella over his wife's back, says it was an accident. Yes, he didn't mean to break the umbrella.

Canadian railroads last year carried 51,000,000 passengers and only four were killed and 240 injured. 185,177 employees were in railway work and 91 were killed and 1,344 injured.

What about having an annual clean-up day, and start to clean up the back yards and lessen our epidemic and fire risks as well as making our town more attractive. Here is where co-operation will work wonders in our town.

A little girl was asked the other day why the hen that laid that yellow Easter egg carried such a bluish. The girl replied that the hen was probably ashamed of what she had done, and couldn't help blushing.

Approximately \$1,500,000 collected from Canadian automobile dealers in luxury taxes may be returned to them by the Dominion government if an agreement can be reached between the cabinet and representatives of the Dominion-retail merchants association.

Men and women are made what they are by what they do when they have nothing to do. It is what a man does when he doesn't have to that counts in his own upbuilding. The personal question is: "what do I do when I have nothing else to do?"

An Airdale terrier in the radio receiving room of the University of Kentucky heard his owner at Pittsburgh, Pa., call him. The dog was sleeping as his master's voice came in, and sprang to his feet, wagged his tail and espied about the radio outfit.

One local woman, sending an order to Eaton's, suddenly thought that the management address had been changed owing to the death of Sir John, so she simply addressed "T. Eaton Company, Toronto."

Note: If not there, please forward to Sir John's new address."

The Canadian Bank of Commerce declares Canada to be suffering, like many other countries, from an over-extension of the functions of government whose financing calls for greater taxation than can be borne, instancing the total of taxes in Manitoba, \$57,190,000, against the total value of cereals produced in the province, \$40,500,000.

Mr. Jack Brennan, from Coleman, Alta., has arrived in High River to assume the duties of express agent with the C.P.R. in the position now occupied by T. Betton. We understand the appointment is in recognition of the C.P.R. seniority system, but the many friends of Tom are indeed sorry to note the change as he has given the people of the town a satisfactory and efficient service and was popular with all. A petition is being circulated and signed by the merchants and others of the town asking for his re-instatement.—High River Times.

TO RENT—Small Furnished Cottage. Apply to S. J. Sargent, Box 33, Blairmore.

Mr. and Mrs. F. M. Thompson returned Saturday morning last from a three-months trip to the Old Country.

Someone has suggested that The Leithbridge Herald title the page devoted to Pass district news "The Knocking Page."

A non-progressive chided his wife with not having a rag to her back when he married her; she retorted: "Don't worry about that, I have plenty now."

Foundation work for the new theatre, poolroom and Johnson & Cousens' store at Bellevue is progressing rapidly. All three buildings are to be of fireproof construction.

Eight or ten carloads of cinders are being unloaded here this week by the C. P. R., who are co-operating with the town in the laying out of a depot park or garden, just east of the station.

We wish to apologize for the manner in which we disgraced a beautiful wedding last week through a typographical error we were made to say "the roses were pink." We meant to say that "the roses were pink."

Our former fellow townsman, Michel Rose, is due here from Vancouver this evening. We understand that the purpose of Mr. Rose's visit is to arrange for the erection of a fireproof store to replace that recently destroyed and occupied by the Cash Grocery. He will also have considerable improvements effected to his other valuable properties here.

Our advice to the public is: "Never go to church on Easter Sunday, for it is absolutely impossible to make connections between what the preacher is saying and what those in the audience are saying about the Easter hats. We went to church on Sunday and, honest to goodness, the text sounded like this: "And the stone was rolled about the feather in Mrs. Morton's new hat."

The refreshment parlor at the rear of the Cornopolitan hotel was searched on Monday by Chief of Police Carter, assisted by the A. P. P. A small quantity of liquor was taken as evidence and the proprietors appeared to answer the charge of having liquor in other than a private dwelling. Magistrate Gresham imposed a fine of \$250 and costs. The two occupants were also charged with obstructing the police in the discharge of their duties by attempting to dispose of liquor from glasses. For this offence they were fined \$10 each.

## Notice of Sitting of Court of Revision.

NOTICE IS HEREBY GIVEN that the Assessment Roll for the Blairmore School District No. 628 of the Province of Alberta has been completed and the same may be examined at the office of the Secretary, and the Board of Trustees of the said School District will sit as a Court of Revision to hear assessment appeals at the schoolhouse on the sixth day of May, 1922, at the hour of Ten o'clock a.m. and no person who does not appear at the said time and place will be entitled to appeal from the decision of the said Court of Revision to a judge of the District Court.

DATED at Blairmore this fifteenth day of April, 1922.
